Feather AS-D2

Feather AS-D2 All Stainless Steel Double Edge Safety Razor Instruction Manual

Brand: Feather | Model: AS-D2 (F1-25-901)

1. INTRODUCTION AND OVERVIEW

The Feather AS-D2 All Stainless Steel Double Edge Safety Razor is a precision-engineered shaving tool designed for a close and comfortable shave. Crafted from durable stainless steel, this three-piece razor offers a balanced feel and is built for longevity. Its design prioritizes both functionality and ease of maintenance, making it a reliable choice for daily grooming.

Figure 1: Feather AS-D2 All Stainless Steel Double Edge Safety Razor. This image displays the complete razor, highlighting its sleek, all-stainless steel construction and textured handle.

2. SETUP: BLADE INSTALLATION

Proper blade installation is crucial for safe and effective shaving. The Feather AS-D2 features a three-piece design for secure blade placement.

1. **Disassemble the Razor:** Hold the razor head firmly and unscrew the handle counter-clockwise until the head separates into three components: the top cap, the blade guard, and the handle.
2. **Place the Blade:** Carefully take a new Feather Hi-Stainless Double Edge Blade from its dispenser. Align the blade with the posts on the blade guard. Ensure the blade sits flat and centered.
3. **Reassemble the Razor:** Place the top cap over the blade and blade guard, ensuring the posts align. Screw the handle back onto the assembly clockwise until it is finger-tight. Do not overtighten.

The Perfect set for the perfect shave

Complete Shaving

Complete Shaving: Includes Razor Handle and 5 High quality Feather Double Edge Razor Blades

Durable Construction

Made with **premium stainless steel** for long-lasting performance and resistance to wear.

Convenient & Hygienic

Easy to **disassemble and clean**, ensuring a smooth and sanitary shaving experience every time.

Video 1: This video demonstrates the process of disassembling the Feather AS-D2 razor, inserting a new double edge blade, and reassembling the razor securely. It highlights the ease of blade replacement for this three-piece design.

3. OPERATING: SHAVING TECHNIQUE

Achieving a close and comfortable shave with a double edge safety razor requires a specific technique. The Feather AS-D2's weighted handle aids in maintaining proper control.

- **Prepare Your Skin:** Always shave after a warm shower or by applying a hot towel to soften your beard. Use a quality shaving cream or soap to create a rich lather.
- **Maintain Proper Angle:** Hold the razor at approximately a 30-degree angle to your skin. This is often found by placing the top cap flat against your skin and slowly lowering the handle until the blade just begins to cut.
- **Use Light Pressure:** The weight of the stainless steel razor is sufficient for cutting. Apply minimal to no pressure. Let the razor do the work.
- **Short, Controlled Strokes:** Use short (1-2 inch) strokes in the direction of hair growth. Rinse the razor head

frequently to prevent clogging.

- **Multiple Passes (Optional):** For a closer shave, re-lather and perform a second pass across the grain, or a third pass against the grain, if your skin tolerates it.

Figure 4: Shaving with the Feather AS-D2. This image shows a man demonstrating the proper technique for using the safety razor, emphasizing the angle and gentle strokes.

4. MAINTENANCE

Regular cleaning and proper storage will extend the life of your Feather AS-D2 razor and ensure hygienic use.

- **Rinse After Each Use:** After each shave, rinse the razor thoroughly under warm running water to remove all soap and hair residue.
- **Disassemble for Deep Cleaning:** Periodically, or when changing blades, disassemble the razor completely. Use a soft brush (like an old toothbrush) and mild soap to clean all components.
- **Dry Thoroughly:** Ensure all parts are completely dry before reassembling and storing. This prevents water spots and potential corrosion.
- **Store Properly:** Store your razor in a dry place, ideally in a stand or a protective case, to prevent accidental damage or dulling of the blade.

5. TROUBLESHOOTING

If you experience issues during shaving, consider the following common solutions:

- **Nicks or Cuts:** This is often due to applying too much pressure or an incorrect blade angle. Lighten your touch and ensure the razor is at a 30-degree angle.
- **Razor Burn/Irritation:** Ensure your skin is well-prepared with warm water and a good lather. Shave with the grain first. Consider a milder blade or a different shaving cream.
- **Ineffective Shave (Tugging):** Your blade might be dull. Replace it with a fresh Feather Hi-Stainless blade. Also, ensure your lather is thick and hydrating.
- **Clogged Razor:** Rinse the razor head frequently under running water during your shave. For stubborn clogs, disassemble and clean thoroughly.

6. SPECIFICATIONS

- **Product Name:** Feather AS-D2 All Stainless Steel Double Edge Safety Razor
- **Model Number:** F1-25-901 (AS-D2)
- **Brand:** Feather
- **Material:** All Stainless Steel
- **Handle Weight:** Approximately 3.2 oz (90 grams)
- **Construction:** Three-piece design
- **Blade Type:** Double Edge (includes 5 Feather Hi-Stainless Blades)
- **Origin:** Made in Japan
