Honeywell HRF-H1

Honeywell HRF-H1 HEPA Air Purifier Filter User Manual

Model: HRF-H1

Product Overview

The Honeywell HRF-H1 HEPA Air Purifier Filter is designed to capture microscopic airborne allergens and particles, including pollen, pet dander, dust mite debris, and smoke. This filter is a crucial component for maintaining the efficiency and performance of compatible Honeywell Air Purifier models.

Image: A diagram illustrating the powerful HEPA filtration, showing icons for pollen, dust, smoke, pet hair/dander, and dust mite debris, indicating the filter's ability to capture these microscopic allergens.

Compatibility

The Honeywell HRF-H1 HEPA Filter is specifically designed for use with the following Honeywell HEPA Air Purifier models:

- HPA050 Series (requires 1 filter)
- HPA150 Series (requires 2 filters)
- HPA060 Series (requires 1 filter)
- HPA160 Series (requires 2 filters)
- HHT055 Series (requires 1 filter)
- HHT155 Series (requires 2 filters)

Ensure you purchase genuine Honeywell replacement filters for optimal performance and efficiency.

Installation and Replacement

To ensure your air purifier operates effectively, replace the HEPA filter annually. Refer to your specific air purifier model's manual for detailed instructions on accessing the filter compartment. The general steps for filter replacement are as follows:

1. **Power Off:** Unplug the air purifier from the power outlet.
2. **Access Filter Compartment:** Open the filter access door or panel on your air purifier. This usually involves unlatching or sliding a cover.
3. **Remove Old Filter:** Carefully remove the used HRF-H1 filter. Note the orientation of the old filter to ensure correct installation of the new one.
4. **Dispose of Old Filter:** Discard the old filter responsibly.
5. **Insert New Filter:** Place the new Honeywell HRF-H1 filter into the compartment. Ensure the "This side in" arrow on the filter points towards the inside of the air purifier. The filter should snap securely into place.

6. **Close Compartment:** Close the filter access door or panel until it latches securely.
7. **Reset Filter Indicator (if applicable):** Plug the air purifier back in. If your model has a filter replacement indicator light, follow the instructions in your air purifier's manual to reset it.

Note: No official seller videos are available for this product's installation. Please refer to the written instructions and your air purifier's specific manual.

Maintenance

For optimal performance, it is recommended to replace the Honeywell HRF-H1 HEPA Filter every 12 months. Actual replacement frequency may vary depending on air quality and usage. Regularly check your air purifier's filter indicator light, if available, as it will signal when a replacement is due.

Troubleshooting

If your air purifier's performance seems diminished after filter replacement, consider the following:

- **Incorrect Orientation:** Ensure the new filter is inserted with the correct side facing inward, as indicated by the "This side in" arrow.

- **Filter Indicator Not Reset:** If the filter change indicator light remains on, follow your air purifier's specific instructions to reset it. This often involves pressing and holding a reset button for a few seconds.
- **Airflow Obstruction:** Check for any obstructions around the air intake or output vents of the air purifier.
- **Non-Genuine Filter:** Using non-genuine filters may compromise performance. Always use genuine Honeywell replacement filters.

For further assistance, refer to your air purifier's main user manual or contact Honeywell customer support.

Specifications

Model Number	HRF-H1
Item Weight	6.4 ounces
Product Dimensions	10.12 x 1.65 x 4.84 inches (25.7 x 4.2 x 12.3 cm)
Material	Carbon Fiber
Filter Type	Certified HEPA Filter
Replacement Frequency	Recommended every 12 months
