- Avoid prolonged exposure to direct sunlight to prevent drying and cracking of the vegan leather.
- Keep the chair away from direct heat sources.
- Clean spills promptly using as little water as possible.

TROUBLESHOOTING

Wireless Audio Issues

If experiencing static, hissing, or intermittent sound with wireless audio, ensure the chair and transmitter are on the same channel (if applicable) and that the volume is adequately adjusted. A wired connection may offer a more stable audio experience for some setups. Consider using a high-quality 3.5mm audio cable for wired connections.

No Sound

- Check all cable connections to ensure they are secure.
- Verify the power supply is connected and the chair is turned on.
- Ensure the volume on both the chair and the connected device is turned up.
- For Bluetooth, ensure the chair is properly paired with your device.
