SETUP

The Chanel Allure Homme Edition Blanche Eau de Toilette Spray is ready for use directly out of its packaging. No assembly or complex setup is required.

First Use Preparation:

1. Carefully remove the bottle from its packaging.

2. Remove the protective cap from the spray nozzle.
3. For the first application, it may be necessary to prime the pump by pressing the spray nozzle a few times until a fine mist is dispensed.

OPERATING INSTRUCTIONS

To achieve the best and most lasting fragrance experience, proper application is key.

Application Guidelines:

- **Target Areas:** Apply the Eau de Toilette to pulse points where the skin is warmer, as this helps to diffuse the scent throughout the day. Common pulse points include the wrists, neck, chest, and behind the ears.
- **Distance:** Hold the bottle approximately 5-7 inches (12-18 cm) away from your skin when spraying to ensure an even distribution of the mist.
- **Quantity:** One to two sprays are typically sufficient. Avoid over-application, as this can be overwhelming.
- **Avoid Rubbing:** After spraying, do not rub the fragrance into your skin. This can break down the scent molecules and alter the fragrance's intended development.
- **Layering (Optional):** For a more intense and longer-lasting scent, consider using complementary products from the Chanel Allure Homme Edition Blanche range, such as shower gel or aftershave, if available.

MAINTENANCE

Proper storage and care will help preserve the quality and longevity of your fragrance.

Storage Recommendations:

- **Cool, Dry Place:** Store the fragrance in a cool, dry place away from direct sunlight and extreme temperature fluctuations. Heat and light can degrade the fragrance over time.
- **Original Packaging:** Keeping the bottle in its original box can provide additional protection from light.
- **Upright Position:** Always store the bottle upright to prevent leakage.
- **Secure Cap:** Ensure the cap is securely placed on the bottle after each use to prevent evaporation and contamination.

TROUBLESHOOTING

If you encounter any issues with your fragrance, consider the following common solutions.

Common Issues:

- **Spray Nozzle Clogged:** If the spray nozzle is not dispensing properly, gently wipe it with a damp cloth. If it remains clogged, try priming the pump again by spraying a few times. Do not attempt to disassemble the nozzle.
- **Scent Not Lasting:** Fragrance longevity can vary based on skin type, climate, and application method. Ensure you are applying to pulse points and not rubbing the fragrance. Hydrating your skin before application can also help.
- **Scent Alteration:** If the scent seems to have changed, check the storage conditions. Exposure to heat, light, or air can cause the fragrance to degrade. Ensure the cap is always sealed tightly.
