DANCO Lever Handle Replacement Instruction Manual

Model: 10419

INTRODUCTION

This manual provides instructions for the installation, operation, and maintenance of the DANCO Lever Handle Replacement, Model 10419. This handle is designed to replace existing lever handles on single-handle American Standard, Delta, and Price Pfister kitchen and lavatory faucets. Please read these instructions carefully before proceeding with installation.

INSTALLATION INSTRUCTIONS

Tools Required:

- Adjustable wrench or pliers
- Screwdriver (Phillips or flathead, depending on existing handle)
- Cleaning cloth

Step-by-Step Installation:

1. **Turn off Water Supply:** Locate the hot and cold water supply valves under the sink and turn them off completely. Turn on the faucet to drain any remaining water and relieve pressure.
2. **Remove Old Handle:**
Most lever handles have a set screw located on the underside or back of the handle. Use a screwdriver to loosen or remove this screw. Once the screw is loose, pull the old handle straight up and off the faucet stem.

3. **Clean Faucet Stem:** Clean any mineral deposits or debris from the faucet stem and surrounding area.
4. **Install New Handle:**
Align the new DANCO lever handle (Model 10419) with the faucet stem. Ensure the handle is oriented correctly for hot and cold operation. Press the handle down firmly onto the stem.

5. **Secure Handle:** Locate the set screw on the new handle and tighten it with a screwdriver until the handle is secure. Do not overtighten.
6. **Restore Water Supply:** Slowly turn the hot and cold water supply valves back on. Check for leaks around the handle base.
7. **Test Operation:** Operate the faucet to ensure proper function and smooth movement of the handle.

OPERATION

The DANCO Lever Handle operates by moving the lever to control water flow and temperature. Lift the handle to increase water flow and lower it to decrease or stop flow. Move the handle left for hot water and right for cold water, or according to your faucet's specific configuration.

MAINTENANCE

To maintain the chrome finish and ensure longevity of your DANCO Lever Handle, follow these simple guidelines:

- **Cleaning:** Clean the handle regularly with a soft, damp cloth. For stubborn spots, use a mild soap solution and rinse thoroughly.
- **Avoid Harsh Cleaners:** Do not use abrasive cleaners, scouring pads, or chemical solvents, as these can damage the chrome finish.
- **Check for Looseness:** Periodically check the set screw on the underside of the handle. If the handle feels loose, gently tighten the set screw with a screwdriver.
