## Vestal SN034

# Vestal SN034 Saint Men's Watch Instruction Manual

Model: SN034

## 1. PRODUCT OVERVIEW

---

The Vestal SN034 Saint is a men's analog watch featuring a Japanese Quartz movement. It is designed with a minimalist dial, a 60-second subdial, and a durable stainless steel case. The watch is secured with a premium canvas cuff strap, offering both style and comfort. This manual provides essential information for the proper use and care of your Vestal Saint watch.

## 2. SETUP

---

### 2.1 Initial Time Setting

1. **Pull out the crown:** Locate the crown on the right side of the watch case. Gently pull the crown outwards to the time-setting position.
2. **Set the time:** Rotate the crown clockwise or counter-clockwise to move the hour and minute hands to the correct time.
3. **Push in the crown:** Once the time is set, push the crown back into its original position. Ensure it is fully

sealed to maintain water resistance.

## 2.2 Wearing the Watch

The Vestal Saint features a canvas cuff strap with a tang buckle. To wear:

1. Open the tang buckle.
2. Place the watch on your wrist.
3. Insert the tang through an appropriate hole in the strap to achieve a comfortable and secure fit.
4. Fasten the strap by securing the tang in the buckle and tucking the excess strap into the keepers.

## 3. OPERATING THE WATCH

---

### 3.1 Reading the Time

The watch displays time using traditional hour and minute hands on an analog dial. The 60-second subdial, located at the 6 o'clock position, indicates the current second.

Figure 2: Close-up view of the Vestal SN034 Saint watch dial. This image highlights the minimalist design and the 60-second subdial.

### 3.2 Water Resistance

This watch is water resistant to 165 feet (50 meters). This rating makes it suitable for swimming and showering. However, it is not recommended for diving or prolonged submersion. Ensure the crown is fully pushed in before any contact with water.

## 4. MAINTENANCE

---

### 4.1 Cleaning

- **Case:** Wipe the stainless steel case with a soft, damp cloth. Avoid harsh chemicals or abrasive materials.
- **Strap:** The canvas strap can be gently cleaned with a mild soap solution and a soft brush. Allow it to air dry completely before wearing. Avoid saturating the leather components.

### 4.2 Battery Replacement

The watch is powered by a battery. When the watch stops or the second hand begins to skip, it indicates a low battery. Battery replacement should be performed by a qualified watch technician to ensure proper sealing and maintain water resistance.

## 5. TROUBLESHOOTING

---

- **Watch not running:** Check if the crown is fully pushed in. If it is, the battery may need replacement.
- **Time is incorrect:** Reset the time as described in Section 2.1. If the issue persists, the movement may require inspection.
- **Condensation under crystal:** This may indicate a loss of water resistance. Avoid further contact with water and seek professional service immediately.

## 6. SPECIFICATIONS

---

Feature	Specification
Model Number	SN034
Movement Type	Japanese Quartz
Display Type	Analog
Case Material	Stainless Steel
Case Diameter	42 mm
Case Thickness	10.5 mm
