**CLOCKY CLKYb**

# CLOCKY Extra Loud Alarm Clock Instruction Manual

Model: CLKYb

Brand: CLOCKY

## Introduction

Welcome to the CLOCKY Extra Loud Alarm Clock user manual. This guide provides essential information for setting up, operating, and maintaining your CLOCKY alarm clock, designed specifically for heavy sleepers. Its unique features ensure you get out of bed on time by rolling away and sounding a loud alarm.

## Key Features

- **Runaway Alarm Clock:** Jumps from your bedside and runs away to ensure you get up.
- **Extra Loud Alarm:** Designed for heavy sleepers with a super loud digital alarm.
- **Wheeled Movement:** Features wheels that allow it to roll and move, forcing you to chase it.
- **Snooze Option:** Offers a single snooze option before it runs away, or can be set to no snooze.
- **Easy to Set:** Simple controls for setting time and alarm.
- **Durable Design:** Made from plastic, built to withstand drops from a nightstand.

## Setup Guide

### 1. Battery Installation

The CLOCKY alarm clock requires 4 AAA batteries (not included). To install:

1. Locate the battery compartment on the underside of the clock.
2. Use a small screwdriver to open the battery compartment cover.
3. Insert 4 AAA batteries, ensuring correct polarity (+/-).
4. Replace the battery compartment cover and secure it with the screw.

Image: A hand inserting AAA batteries into the battery compartment of a light blue Clocky alarm clock. The compartment is located on the underside of the clock, between its two large wheels.

## 2. Setting the Time

To set the current time on your CLOCKY:

1. Press the 'T' (Time) button located on the top of the clock. The time display will start flashing.
2. Use the 'H' (Hour) button to adjust the hour.
3. Use the 'M' (Minute) button to adjust the minutes.
4. Press the 'T' button again to confirm and save the time.

Image: A hand pressing buttons on the top of a black Clocky alarm clock to set the time. The digital display shows "6:30".

### 3. Setting the Alarm

To set your wake-up alarm:

1. Press the 'A' (Alarm) button located on the top of the clock. The alarm time display will start flashing.
2. Use the 'H' (Hour) button to adjust the alarm hour.
3. Use the 'M' (Minute) button to adjust the alarm minutes.
4. Press the 'A' button again to confirm and save the alarm time.

## Operating Your CLOCKY

### 1. Activating the Alarm and Movement

CLOCKY offers different modes for its alarm and movement:

- **Alarm Only:** To use CLOCKY as a stationary alarm clock, ensure the wheels icon button is not activated. The alarm will sound without the clock moving.
- **Alarm with Movement:** To activate the runaway feature, press the button with the wheels icon. When the alarm sounds, CLOCKY will jump from your nightstand (if placed on one) and roll around, forcing you to get out of bed to turn it off.

Image: A black Clocky alarm clock with white wheels displayed in front of its brown and black packaging box. The clock's digital display shows "6:30".

## 2. Snooze Function

CLOCKY allows for a single snooze. When the alarm sounds, press the large "Snooze" button on top. The alarm will temporarily stop and then resume after a short period, at which point CLOCKY will begin to roll away if the movement feature is activated.

Image: A hand reaching towards the top of a black Clocky alarm clock, seemingly to press the snooze button. The clock is on a surface, and its digital display shows "6:30".

## 3. Alarm Sound

The alarm sound is designed to be loud and attention-grabbing, featuring an R2D2-like sound to ensure heavy sleepers wake up. There is no volume control for the alarm sound.

Image: A black Clocky alarm clock on a white surface, with three circular icons above it. The icons represent "LOUD ALARM" (bell), "JUMPS RUNS" (two circles with a line), and "EASY SET UP" (a checkmark). The clock's digital display shows "6:30".

## 4. Movement in Action

When the movement feature is active, CLOCKY will roll off surfaces up to 3 feet high and navigate around obstacles. This ensures you physically engage with the alarm to turn it off, promoting wakefulness.

Image: A black Clocky alarm clock on a rug next to a bed, with text overlay stating "Clocky is the only alarm clock that forces you up. You'll get out of bed to chase his loud alarm."

## Maintenance

### 1. Cleaning

Wipe the CLOCKY alarm clock with a soft, dry cloth. Do not use abrasive cleaners or immerse the device in water.

### 2. Battery Replacement

Replace batteries when the display dims or the alarm sound weakens. Follow the battery installation steps in the Setup Guide.

## Troubleshooting

| Problem | Solution |
| --- | --- |
| CLOCKY does not move. | Ensure the wheels icon button is activated. Check battery levels. Ensure CLOCKY is on a flat surface from which it can roll. |

| Problem | Solution |
|---|---|
| Alarm is not sounding. | Verify the alarm time is set correctly and the alarm is activated (bell icon). Check battery levels. |
| Time display is dim or blank. | Replace all 4 AAA batteries. |
| CLOCKY rolls off too quickly. | The snooze function allows for a brief delay. If you prefer no movement, deactivate the wheels icon. |

## Specifications

FAQs

CLOCKY

1. Help! My Clocky doesn't move.
Make sure you press the 'wheels on' button which is the left button located on Clocky's face. An icon will appear on the screen indicating that the wheels have been turned on.

Note that Clocky will not move until a minute after the snooze button has been pressed. This may be changed by pressing the 'x' button two times rapidly and then pressing the 'wheels' button to customize your Clocky's snooze time.

2. My Clocky Still Won't Move
First, make sure the batteries are inserted with the correct polarity. Clocky's polarity is different from other devices. You may try removing and re-inserting the batteries.

Second, try pressing the 'x' and 'f' buttons on the top simultaneously to operate the test mode. If your Clocky is functioning properly the display would be on and the wheels will start to move.

3. I've misplaced my manual. Where can I get another?
You can download the Clocky manual from the Clocky product page.

4. How long is your warranty?
We offer a standard 90 day return warranty for product that is determined to be defective. We will happily refund or replace your item at no additional charge.

5. How loud is Clocky?
Our Clocks do have a very loud alarm clock. The reading is 93 db at 1 meter and 100 db at 85 mm. We hope this helps.

6. Can I reduce Clocky's volume?
There are no volume controls on Clocky, however, you may try placing a small piece of tape over the back speaker to reduce the volume. Other customers have tried it and have reported great results.

7. My Clocky's wheels appear loose.
Your Clocky is not defective. The wheels are engineered to stay a little loose. This helps with the impact to the ground. We hope this helps.

8. The Clocky I purchased is for a Gift and I don't want any pricing on the box.
The packing list inside each package comes as a gift receipt. It includes the order #, order date, ship date etc. but does not indicate a price.

9. I'd like to return my product
If your product was purchased from our site within the last 90 days, we can issue an RMA to return your item. Please note that a 15% restocking fee applies. The warranties are policies is fulfilled...
If your product was purchase through another retailer, please contact that retailer to learn about their return policies as they might differ from our policies. Unfortunately, we do not warrant products purchased from unauthorized resellers and there are no Nanda Home authorized resellers on eBay at the moment. Many of the Clockies seen on eBay are knock-offs of low quality.

10. I purchased my product through Ebay and it's not working.
Unfortunately, we do not warrant products purchased from unauthorized resellers and there are no Nanda Home authorized resellers on eBay at the moment. Many of the Clockies seen on eBay are knock-offs of low quality.

11. How do I switch between the 12 and 24 hour clock?
Simply press and hold the 'f' button until the clock changes. It is best to be in a PM hour so you can see when the clock has switched its format.
