

## Husqvarna Titanium Force

# Husqvarna Titanium Force .105-Inch Trimmer Line User Manual

## 1. PRODUCT OVERVIEW

---

The Husqvarna Titanium Force .105-inch trimmer line is a commercial-grade co-polymer product designed for string trimmers. This silver-colored line incorporates advanced technology to deliver extended life, enhanced performance, and faster acceleration. Its level flight characteristics contribute to reduced fuel consumption and quieter operation. This trimmer line is compatible with all standard trimmer heads and includes a free line cutter for convenience.

- Manufactured in the USA, featuring cutting-edge technology for longer life, improved performance, faster acceleration, and stable flight characteristics.
- High cutting efficiency is achieved through optimal material selection, reducing workload.
- Patented design reduces noise levels by 50%, contributing to a better working environment.
- Includes a complimentary line cutter.
- Primarily suited for trimming grass.
- This spool contains 690 feet of .105-inch diameter line.

A spool of Husqvarna Titanium Force .105-inch diameter trimmer line, 690 feet in length, designed for string trimmers. The line is grey and comes with a small line cutter attached to the spool.

## 2. SAFETY INFORMATION

---

Always prioritize safety when handling and using trimmer line. Adhere to the following guidelines:

- Always wear safety glasses to protect your eyes from flying debris.
- Wear long pants to protect your legs.
- Wear sturdy shoes to ensure stable footing and foot protection.
- Be aware of potential hazards in your work area, such as flying debris and cut hazards from the trimmer line itself.

## 3. SETUP

---

This section outlines the general procedure for loading the Husqvarna Titanium Force trimmer line into your string trimmer head. Always refer to your specific string trimmer's instruction manual for detailed, model-specific loading instructions.

1. **Ensure Trimmer is Off:** Before handling the trimmer head, always turn off the engine or disconnect the power source to prevent accidental startup.
2. **Consult Trimmer Manual:** Identify the type of trimmer head you have (e.g., bump feed, fixed line, automatic feed) and consult your trimmer's manual for the correct line loading procedure.
3. **Cut Line to Length:** Measure and cut the Husqvarna Titanium Force .105-inch line to the length specified in your trimmer's manual. The included line cutter can assist with this.
4. **Load Line:** Follow your trimmer's specific instructions for feeding the line into the trimmer head. This may involve winding it onto a spool, threading it through eyelets, or inserting pre-cut lengths. Ensure the line is securely seated.
5. **Verify Compatibility:** Confirm that your trimmer head is designed to accept .105-inch diameter trimmer line. Using an incorrect line size can affect performance and potentially damage the trimmer.

## 4. OPERATING INSTRUCTIONS

---

Once the Husqvarna Titanium Force trimmer line is properly loaded, follow these general operating guidelines for effective and safe trimming. Always refer to your string trimmer's manual for specific operating instructions and safety precautions.

1. **Pre-Operation Check:** Before starting, inspect the trimmer line for any damage or excessive wear. Ensure all guards and safety features on your trimmer are in place and functioning correctly.
2. **Starting the Trimmer:** Start your string trimmer according to the manufacturer's instructions.
3. **Maintain Proper Stance:** Hold the trimmer firmly with both hands, maintaining a balanced and stable stance. Keep the cutting head away from your body.
4. **Trimming Technique:** Use a sweeping motion to cut grass and light vegetation. Avoid hitting hard surfaces like rocks, fences, or concrete, as this can cause the line to break or wear prematurely.
5. **Line Advancement:** If your trimmer has a bump-feed head, gently tap the head on the ground while the trimmer is running at full speed to advance the line. For automatic feed heads, the line will advance as needed.
6. **Avoid Overloading:** Do not attempt to cut excessively thick or woody material with the trimmer line, as this is designed for grass and light weeds.
7. **Post-Operation:** After use, turn off the trimmer, allow it to cool, and clean any debris from the cutting head and guards.

## 5. MAINTENANCE

---

Proper maintenance of your Husqvarna Titanium Force trimmer line ensures optimal performance and extends its lifespan. While the line itself requires minimal maintenance, proper handling and storage are crucial.

- **Storage:** Store the trimmer line spool in a cool, dry place away from direct sunlight and extreme temperatures. This helps prevent the line from becoming brittle or degrading over time.
- **Inspection:** Before each use, inspect the loaded trimmer line for any signs of damage, fraying, or excessive wear. Replace any damaged line immediately.
- **Keep Clean:** Ensure the trimmer head and line exit points are free from grass clippings and debris,

which can impede line feeding.

- **Avoid Kinks:** Handle the line carefully to avoid kinks or sharp bends, which can weaken the line and lead to premature breakage.

## 6. TROUBLESHOOTING

---

This section addresses common issues encountered when using trimmer line and provides general solutions. If problems persist, consult your string trimmer's manual or contact Husqvarna support.

Problem	Possible Cause	Solution
Line breaks frequently	Hitting hard objects; incorrect line loading; old/brittle line; cutting too thick material.	Avoid hard surfaces; ensure correct loading; replace old line; use for intended material (grass/light weeds).
Line does not feed	Line tangled or stuck in spool; debris in trimmer head; incorrect line winding; line fused together.	Turn off trimmer, open head, untangle/rewind line; clean head; separate fused line.
Poor cutting performance	Line too short; worn line; incorrect line diameter for trimmer.	Advance line; replace worn line; ensure .105-inch line is compatible with your trimmer.

## 7. SPECIFICATIONS

---

Feature	Detail
Brand	Husqvarna
Model Name	Titanium Force
Power Source	Manual (for line loading/use with powered trimmer)
Color	Black (line is silver, spool is black)
Item Weight	3.5 Pounds
Cutting Width (Line Diameter)	.105 Inches
Line Length	690 ft
Product Dimensions (Spool)	105"L x 105"W (Note: This dimension appears to be an error in the source data and likely refers to line length/diameter. Actual spool dimensions will be smaller.)
Assembly Required	No (Line loading into trimmer head is required)

Feature	Detail
GTIN / UPC	705788210749
ASIN	B004MW3Q12

## 8. WARRANTY AND SUPPORT

---

For specific warranty information regarding your Husqvarna Titanium Force trimmer line, please refer to the packaging or contact Husqvarna customer support directly. Husqvarna products are generally backed by a manufacturer's warranty against defects in materials and workmanship.

If you require technical assistance, have questions about product compatibility, or need to report an issue, please contact Husqvarna customer service through their official website or the contact information provided with your product purchase.
