Stanley 25-1201

Stanley 25-1201 Reusable Cloth Filter Instruction Manual

Model: 25-1201 | Brand: Stanley

Product Overview

The Stanley 25-1201 reusable blue cloth filter is designed for 1-5 Gallon wet or dry vacuums. This filter is essential for capturing debris and dust, ensuring efficient cleaning in various environments such as garages, workshops, indoor floors, and for liquid or outdoor cleanup. It is washable and reusable, offering a cost-effective and environmentally friendly solution for your vacuuming needs.

Setup and Installation

Installing the Stanley 25-1201 filter is a straightforward process. Follow these steps for proper installation:

1. Ensure your vacuum cleaner is unplugged and the canister is empty.
2. Remove the top motor assembly from the vacuum canister.
3. Locate the filter cage inside the vacuum.
4. Carefully cover the filter cage with the blue cloth filter.
5. Secure the filter in place using the provided clamp ring, ensuring a snug fit around the base of the filter cage.
6. Replace the motor assembly onto the canister, ensuring it is properly latched.

Operating Instructions

Once the filter is correctly installed, your Stanley wet/dry vacuum is ready for operation. The 25-1201 filter is designed for both wet and dry pickup, effectively capturing dust and debris. For optimal performance, ensure the filter is dry when performing dry vacuuming tasks.

Maintenance

The Stanley 25-1201 filter is washable and reusable, extending its lifespan and maintaining vacuum efficiency. Regular cleaning is recommended to prevent clogging and ensure consistent performance.

Cleaning the Filter

1. Remove the filter from the vacuum cleaner.
2. Gently shake off any loose debris or dust.
3. Rinse the filter under running water until clean. Avoid harsh scrubbing or using strong detergents, as this may damage the filter material.
4. Allow the filter to air dry completely before reinstallation. Ensure it is thoroughly dry to prevent mold growth and maintain filtration effectiveness.

Troubleshooting

If you experience reduced suction or poor filtration, consider the following:

- **Check Filter Cleanliness:** A dirty or clogged filter is the most common cause of reduced suction. Clean the filter as described in the Maintenance section.
- **Ensure Proper Installation:** Verify that the filter is correctly seated on the filter cage and the clamp ring is securely fastened. An improperly installed filter can lead to air leaks and reduced performance.
- **Inspect for Damage:** Check the filter for any tears, holes, or excessive wear. A damaged filter will not provide effective filtration and should be replaced.
- **Vacuum Canister Seal:** Ensure the vacuum canister lid is properly sealed. Leaks can reduce suction power.

Specifications

Brand	Stanley
Model Number	25-1201
Material	Polyester
Product Dimensions	20L x 1.3W x 34.5H Centimetres
Reusability	Reusable
Unit Count	1 Count
Manufacturer	Alton Industries
UPC	871613003111

Warranty

The manufacturer provides no specific warranty information for this product. For any concerns regarding defects or performance, please refer to the retailer's return policy or contact customer support.

Support
