2. SETUP

Upon receiving your Oneida Icarus 20-Piece Flatware Set, carefully remove all packaging materials. It is recommended to wash the flatware thoroughly before its first use to remove any manufacturing residues.

3. OPERATING INSTRUCTIONS

The Oneida Icarus flatware is designed for daily dining. Each piece is balanced for comfortable handling. The dinner knives are suitable for cutting various foods, while the forks and spoons are crafted for efficient and enjoyable eating. The robust construction ensures durability for regular use.

4. MAINTENANCE AND CARE

The Oneida Icarus flatware is dishwasher safe. For best results and to maintain the mirror finish, follow these guidelines:

- Rinse promptly after use to remove food particles, especially acidic foods like citrus or tomato, which can cause staining if left for extended periods.
- Load flatware loosely in the dishwasher basket to allow for proper water circulation and prevent scratching.
- Avoid using abrasive cleaners, steel wool, or harsh scouring pads, which can scratch the surface and dull the finish.
- Remove flatware from the dishwasher promptly after the cycle and hand-dry with a soft cloth if water spots are a concern, particularly in areas with hard water.
- While rust-resistant, prolonged exposure to certain chemicals or high humidity can affect the finish. If rust spots appear, they can often be removed with a non-abrasive stainless steel cleaner.

5. TROUBLESHOOTING

This section addresses common issues you might encounter with your flatware.

Water Spots

If water spots occur after dishwashing, they are typically due to mineral deposits from hard water. To prevent this, hand-dry immediately after washing or use a rinse aid in your dishwasher.

Minor Scratches

Surface scratches can occur with regular use. These are generally cosmetic and do not affect the performance or durability of the flatware. To minimize scratching, avoid harsh scrubbing or stacking sharp objects directly on the flatware.

Dull Finish

If the mirror finish appears dull over time, a stainless steel polish can help restore its luster. Follow the product instructions for the specific polish used.
