Kokido K738CBX

Kokido K738CBX Handheld Manual Vacuum User Manual

Model: K738CBX

1. INTRODUCTION

Thank you for choosing the Kokido K738CBX Handheld Manual Vacuum. This device is designed for efficient and convenient cleaning of sand, gravel, and other small debris from swimming pools and hot tubs. This manual provides essential information for the safe and effective operation, maintenance, and troubleshooting of your vacuum.

Safety Information

- Read all instructions thoroughly before using the product.
- Keep this manual for future reference.
- This product is intended for cleaning swimming pools and hot tubs only. Do not use for other purposes.
- Keep out of reach of children.
- Do not attempt to modify the device.

2. PACKAGE CONTENTS

Verify that all components are present in the package:

- Kokido K738CBX Manual Vacuum Unit
- Attachable Leaf Skimmer
- Wall Mounting Bracket
- User Manual

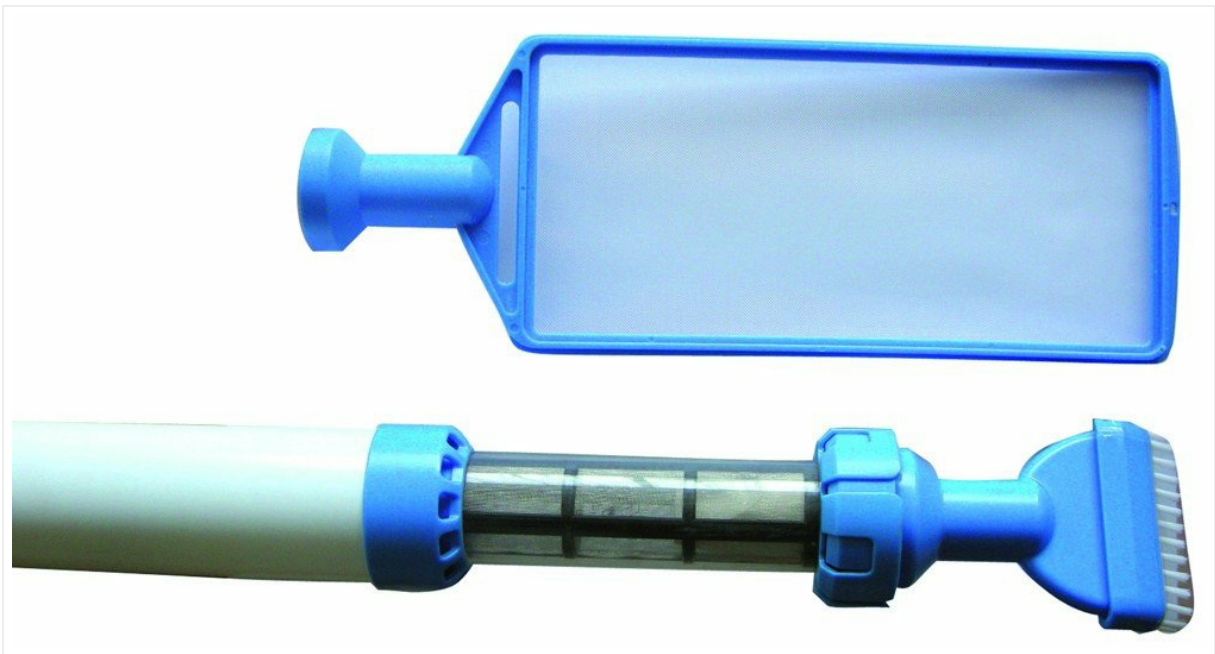

Image of the Kokido K738CBX Handheld Manual Vacuum. It shows the main vacuum unit with its transparent debris collection chamber and the pump handle. The attachable leaf skimmer is also visible.

3. SETUP

The Kokido K738CBX requires no complex assembly or electrical connections.

1. Unpack all components from the packaging.
2. If desired, attach the leaf skimmer to the vacuum unit. This accessory is used for collecting floating debris from the water surface.
3. The included wall mounting bracket can be installed in a convenient location for storage. (Mounting hardware and specific instructions for bracket installation are not provided with the vacuum unit.)

4. OPERATING INSTRUCTIONS

Follow these steps for effective cleaning:

1. **Submerge the Vacuum:** Fully submerge the vacuum head and the transparent debris collection chamber into the water of your pool or hot tub. Ensure no air is trapped inside the chamber.
2. **Position Over Debris:** Guide the vacuum head over the area containing sand, gravel, or other debris you wish to remove.
3. **Initiate Suction:** Firmly pump the handle up and down. Each pumping motion creates suction, drawing water and debris into the transparent filter chamber.
4. **Collect Debris:** Continue pumping and moving the vacuum slowly over the dirty areas. The debris will be visible accumulating in the see-through filter.
5. **Empty Filter:** When the filter chamber appears full or suction decreases, remove the vacuum from the water and empty the collected debris.
6. **Repeat:** Re-submerge and continue cleaning until the desired area is clear of debris.

5. MAINTENANCE

Regular maintenance ensures optimal performance and extends the life of your vacuum.

- **After Each Use:** Empty the debris from the transparent filter chamber. Rinse the filter and the entire

vacuum head thoroughly with clean water to remove any remaining particles.

- **Storage:** Store the vacuum in a clean, dry place away from direct sunlight and extreme temperatures. Utilize the wall mounting bracket for convenient and organized storage.
- **Inspection:** Periodically inspect the vacuum for any signs of wear, cracks, or damage. Ensure all parts are securely attached.

6. TROUBLESHOOTING

If you encounter issues with your Kokido K738CBX, refer to the following common problems and solutions:

- **No Suction or Weak Suction:**
 - Ensure the vacuum head is fully submerged in water and no air is trapped.
 - Check if the transparent filter chamber is full of debris and needs emptying.
 - Verify that all connections on the vacuum unit are secure.
- **Ineffective Debris Collection:**
 - Pump the handle more vigorously and consistently.
 - Move the vacuum head more slowly over the debris to allow sufficient time for suction.

7. SPECIFICATIONS

Model	K738CBX
Brand	Kokido
Power Source	Manual
Application	Swimming Pools, Hot Tubs, Spas
Features	Handheld, no hoses/electrical cords required, integrated transparent filter, includes leaf skimmer and wall mount.
Required Assembly	No
