## VOGUE CF339

# Vogue Cast Iron Juice Extractor User Manual

Model: CF339

## INTRODUCTION

---

Welcome to the user manual for your new **Vogue Cast Iron Juice Extractor**, Model CF339. This heavy-duty, manual juicer is designed for efficient and effortless extraction of juice from citrus fruits, suitable for both commercial and home use. Its robust cast iron construction ensures durability and stability, while the simple lever mechanism maximizes juice yield without the need for electricity. Enjoy fresh, natural juice anytime, anywhere.

Key features include:

- **Maximum Juice Extraction:** Engineered to extract every last drop, ensuring you get the most out of your fruits.
- **Heavy-Duty Construction:** Built to withstand everyday use, perfect for both domestic & commercial settings.
- **Manual Lever Operation:** Simple to use with a lever that maximises pressure without the need for electricity.
- **Portable & Convenient:** No power connection needed, making it easy to move & use in various locations.
- **Hassle-Free Cleaning:** Features a detachable juicing cone that is dishwasher safe for quick & easy cleaning.
- **Ready to Use Anytime:** Simply place a cup underneath to catch the fresh juice as you press the lever down.

## IMPORTANT SAFETY INFORMATION

---

Please read all instructions carefully before using the Vogue Cast Iron Juice Extractor. Failure to follow these safety guidelines may result in injury or damage to the product.

- Always place the juicer on a stable, flat, and non-slip surface before operation to prevent tipping.
- Keep hands and fingers clear of the juicing cone and pressing mechanism during operation to avoid pinching.

- This appliance is designed for juicing citrus fruits only. Do not attempt to juice other types of fruits or vegetables as this may damage the unit.
- Do not force the lever down excessively. Apply steady, firm pressure.
- Keep out of reach of children. This is not a toy.
- Inspect the juicer for any damage before each use. Do not use if any parts are broken or missing.
- Clean the juicer thoroughly after each use as per the cleaning instructions to prevent residue buildup.
- Exercise caution when handling the juicing cone and strainer as they may have sharp edges.

## PRODUCT COMPONENTS

---

Familiarize yourself with the parts of your Vogue Cast Iron Juice Extractor:

1. **Handle/Lever:** The long arm used to apply pressure.
2. **Pressing Cone:** The upper part that presses down onto the fruit.
3. **Juicing Cone/Strainer:** The lower, removable part where the fruit sits and juice drains through.
4. **Cup Holder/Base:** The sturdy base that holds the juicing cone and collects juice.
5. **Main Frame:** The heavy cast iron structure providing stability.

*Figure 2: Close-up view of the juicing cone and strainer, showing where the fruit is placed.*

## SETUP

---

Before first use, and after each cleaning, follow these steps:

1. **Unpack:** Carefully remove all components from the packaging. Retain packaging for future storage or transport if desired.
2. **Initial Cleaning:** Wash the detachable juicing cone and strainer thoroughly with warm, soapy water. Rinse well and dry completely. Wipe down the main cast iron frame with a damp cloth.
3. **Assembly:** Ensure the juicing cone and strainer are correctly seated in the base. The unit typically comes pre-assembled, but verify all connections are secure.
4. **Placement:** Place the juicer on a sturdy, level, and non-slip surface. Ensure there is enough clearance above the unit for the lever to be fully raised.

## OPERATING INSTRUCTIONS

---

Follow these steps to extract juice efficiently:

1. **Prepare Fruit:** Select fresh citrus fruits (oranges, lemons, limes, grapefruits). Cut the fruit in half across the middle.
2. **Position Fruit:** Place one half of the cut fruit, cut-side down, onto the juicing cone.
3. **Place Cup:** Position a glass or container directly beneath the juicing cone to collect the extracted juice.
4. **Lower Lever:** Slowly and firmly pull the handle/lever down. The pressing cone will descend and press the fruit against the juicing cone, extracting the juice. Apply steady pressure until all juice is extracted.
5. **Release Lever:** Once juicing is complete, slowly release the lever back to its upright position.
6. **Remove Pulp:** Remove the squeezed fruit half and discard the pulp. Repeat the process for additional fruit halves.

## MAINTENANCE AND CLEANING

Proper cleaning and maintenance will ensure the longevity and optimal performance of your juicer.

- **After Each Use:** Immediately after each juicing session, remove the detachable juicing cone and strainer.
- **Dishwasher Safe Parts:** The juicing cone and strainer are dishwasher safe. Place them on the top rack of your dishwasher for cleaning.
- **Hand Washing:** For best results or if a dishwasher is not available, wash the juicing cone and strainer with warm, soapy water using a brush to remove pulp. Rinse thoroughly.
- **Main Unit Cleaning:** Wipe down the main cast iron frame and lever with a damp cloth. Do not immerse the main unit in water.
- **Drying:** Ensure all parts are completely dry before reassembling or storing to prevent rust, especially on the cast iron components.
- **Storage:** Store the juicer in a dry place.

## TROUBLESHOOTING

If you encounter any issues with your juicer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Not enough juice extracted.	<ul style="list-style-type: none"><li>◦ Fruit not ripe enough.</li><li>◦ Insufficient pressure applied.</li><li>◦ Fruit not centered on cone.</li></ul>	<ul style="list-style-type: none"><li>◦ Use ripe, juicy citrus fruits.</li><li>◦ Apply firm, steady pressure on the lever.</li><li>◦ Ensure fruit half is centered on the juicing cone.</li></ul>
Juicer feels unstable or wobbles.	<ul style="list-style-type: none"><li>◦ Not on a flat surface.</li><li>◦ Loose components.</li></ul>	<ul style="list-style-type: none"><li>◦ Place on a stable, level countertop.</li><li>◦ Check all bolts and screws for tightness (if applicable, though this model is largely fixed).</li></ul>
Difficulty cleaning pulp from strainer.	<ul style="list-style-type: none"><li>◦ Pulp dried onto strainer.</li></ul>	<ul style="list-style-type: none"><li>◦ Clean immediately after use.</li><li>◦ Soak the strainer in warm, soapy water before scrubbing.</li><li>◦ Use a small brush to dislodge stubborn pulp.</li></ul>
