2. **Select a Challenge:** Choose a challenge from the provided booklet. Challenges are categorized by difficulty: Starter, Junior, Expert, Master, and Wizard.

4. **Identify Required Pieces:** The challenge diagram will also indicate which twisted puzzle pieces are needed for that specific puzzle.

4. HOW TO PLAY (OPERATING)

The objective of IQ Twist is to fit all the indicated twisted puzzle pieces onto the game board, ensuring that each piece covers pegs of its own color. Some pieces have holes, allowing pegs to pass through, while others are solid. The position of the holes in the pieces must align with the pegs on the board.

1. **Arrange Pieces:** Take the twisted puzzle pieces specified for your chosen challenge.
2. **Fit Pieces on the Board:** Strategically place the twisted pieces onto the game board. Each piece must fit over pegs of its own color. Some pieces may need to be rotated or flipped to fit correctly.
3. **Complete the Puzzle:** The puzzle is solved when all the specified twisted pieces are placed on the

game board, covering all pegs of their respective colors, and no empty holes remain within the designated play area.

There is only one correct solution for each challenge. If you get stuck, you can refer to the solutions provided at the back of the challenge booklet.
