Blum Blum Tip-On

Blum Tip-On Magnetic Touch Latch User Manual

Model: Blum Tip-On

INTRODUCTION

The Blum Tip-On Magnetic Touch Latch provides a convenient and handle-free solution for opening standard doors. This mechanism allows doors to be opened with a simple touch, making it ideal for modern cabinet designs. This manual provides essential information for the proper installation, operation, and maintenance of your Blum Tip-On Magnetic Touch Latch.

SETUP AND INSTALLATION

Proper installation is crucial for the optimal performance of the Blum Tip-On Magnetic Touch Latch. There are two primary methods for installation:

- Direct Bore Installation:** The latch can be directly bored into the side panel of the cabinet. Ensure precise measurements and drilling to secure the latch firmly.
- Adjustable Adapter Plate Installation:** Alternatively, the latch can be used with adjustable adapter plates. These plates offer flexibility in positioning and can simplify installation in certain cabinet configurations.

Always ensure the latch is aligned correctly with the door to allow for smooth engagement and disengagement. Refer to the specific instructions provided with any adapter plates if used.

Image: Components of the Blum Tip-On Magnetic Touch Latch, showing the main latch unit, a mounting screw, and a washer. These parts are essential for securing the latch to the cabinet structure.

OPERATING INSTRUCTIONS

The Blum Tip-On Magnetic Touch Latch is designed for intuitive operation:

- **To Open:** Gently press the door panel. The Tip-On mechanism will release the door, allowing it to spring open slightly. You can then pull the door fully open.
- **To Close:** Simply push the door shut until the Tip-On mechanism engages and holds the door securely in the closed position.

Avoid forcing the door open or closed, as this can damage the latch mechanism or the door itself.

MAINTENANCE

To ensure the longevity and smooth operation of your Blum Tip-On Magnetic Touch Latch, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the visible parts of the latch with a soft, dry cloth. If necessary, use a slightly damp cloth with mild soap, then dry thoroughly. Avoid abrasive cleaners or solvents.
- **Inspection:** Periodically check the latch for any signs of wear or damage. Ensure all mounting screws are tight.
- **Lubrication:** The internal mechanism is generally maintenance-free. Do not apply lubricants unless specifically instructed by the manufacturer, as this can attract dust and hinder performance.

TROUBLESHOOTING

If you encounter issues with your Blum Tip-On Magnetic Touch Latch, consider the following:

- **Door Not Opening/Closing Smoothly:**
 - Check for proper alignment of the latch with the door. Misalignment can prevent proper engagement.
 - Ensure there are no obstructions preventing the door from moving freely.
 - Verify that the mounting screws are secure and the latch is not loose.
- **Latch Not Engaging/Disengaging:**
 - Confirm that the door is making full contact with the latch mechanism when closed. Adjust the door or latch position if necessary.
 - If using an adjustable adapter plate, ensure it is correctly positioned and secured.
- **Weak Latch Action:**
 - Inspect the latch for any debris or foreign objects that might be impeding its spring mechanism.
 - Ensure the latch is fully extended when the door is open, indicating proper spring function.

If problems persist after attempting these solutions, contact the seller or manufacturer for further assistance.

SPECIFICATIONS

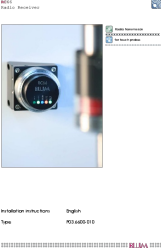

Feature	Detail
Brand	Blum (Manufacturer), HandyCT (Distributor)
Model Number	Blum Tip-On
Part Number	ABL.955.1004
UPC	503809499315
