Timex Weekender 38mm Unisex Analog Watch Instruction Manual

Model: T2N647PF

1. PRODUCT OVERVIEW

The Timex Weekender 38mm Unisex Analog Watch is a versatile and durable timepiece designed for everyday wear. It features a classic analog display with full Arabic numerals, including 24-hour military time, and is equipped with the signature INDIGLO backlight for enhanced visibility in low-light conditions. The watch comes with an adjustable nylon slip-through strap, offering comfort and ease of customization.

2. SETUP

2.1 Adjusting the Strap

The Timex Weekender features a slip-through nylon strap that is easy to adjust and interchange. To adjust, simply slide the watch case along the strap until it fits comfortably on your wrist. The strap is designed to fit wrist circumferences up to 8 inches.

Side view illustrating the slip-through design of the nylon strap.

2.2 Setting the Time

1. Pull the crown (the small knob on the side of the watch case) outwards to the time-setting position.
2. Rotate the crown clockwise or counter-clockwise to move the hour and minute hands to the correct time.
3. Once the time is set, push the crown back in to its original position to start the watch.

3. OPERATING INSTRUCTIONS

3.1 Using the INDIGLO Backlight

The Timex Weekender watch is equipped with an INDIGLO light-up watch dial for easy reading in the dark. To activate the backlight, simply press and hold the crown. The entire dial will illuminate. Release the crown to turn off the light.

Important Note:

Leaving the watch in direct sunlight or close to a lamp for extended periods may cause the watch to become hot. Handle with care under such conditions.

4. MAINTENANCE

4.1 Water Resistance

This watch is water resistant to 30 meters (100 feet). This means it can withstand splashes or brief immersion in water, such as during hand washing or light rain. However, it is **not suitable** for swimming, bathing, showering, or any prolonged water activities.

4.2 Strap Care

The durable nylon fabric strap is designed for longevity. To clean the strap, gently hand wash it with mild soap and water, then allow it to air dry completely. Avoid harsh chemicals or excessive scrubbing, which could damage the fabric.

4.3 Battery Life

The Timex Weekender watch is powered by a Lithium Metal battery (included). These batteries are known for their long lifespan, providing reliable operation for extended periods. When the battery eventually needs replacement, it is recommended to have it done by a qualified watch technician to ensure proper sealing and water resistance.

5. TROUBLESHOOTING

5.1 Loud Ticking Sound

Some users may notice that the Timex Weekender watch produces a distinct ticking sound. This is a characteristic of the watch's movement and is considered normal. If the sound is unusually loud or changes significantly, it may indicate an issue, and professional inspection is recommended.

5.2 Watch Becomes Hot

As mentioned in the operating instructions, prolonged exposure to direct sunlight or strong artificial light sources can cause the watch case to heat up. This is normal. If the watch becomes excessively hot without such exposure, discontinue use and consult customer support.

6. SPECIFICATIONS

Feature	Detail
Model Number	T2N647PF
Product Dimensions	5.12 x 5.12 x 5.12 inches; 0.16 ounces
