Fleshlight 708

Fleshlight Ice Lady Clear Male Masturbator Instruction Manual

Model: 708 | Brand: Fleshlight

1. PRODUCT OVERVIEW

The Fleshlight Ice Lady is a transparent male masturbator designed for a unique visual and tactile experience. It features a SuperSkin sleeve with intricate internal textures, housed within a clear casing that allows for adjustable suction. This manual provides essential information for the proper setup, operation, and maintenance of your device.

2. SETUP

1. **Preparation:** Before first use, and for each subsequent use, remove the SuperSkin sleeve from its casing.
2. **Warm-up:** Run warm water through the sleeve for approximately 5 minutes to enhance the realistic feel. *Do not boil or microwave the sleeve.*
3. **Lubrication:** Shake off excess water from the sleeve. Apply a liberal amount of water-based lubricant to the sleeve's orifice and to yourself. A sample packet of water-based lubricant is included with your purchase.
4. **Re-insertion:** Carefully re-insert the lubricated sleeve into the clear casing.
5. **Adjust Suction:** The end-cap at the bottom of the casing can be tightened or loosened to control the level of suction, allowing you to customize your experience.

3. OPERATING INSTRUCTIONS

Once prepared, the Fleshlight Ice Lady is ready for use. The transparent design allows for visual engagement during use, while the patented SuperSkin material and internal textures provide a highly realistic sensation.

Image 2: Close-up view of the Ice Lady's textured orifice, designed for enhanced sensation.

The internal texture is based on the Stoya Destroya mold, known for its stimulating ridges and contours. Experiment with the adjustable suction to find your preferred level of intensity.

4. MAINTENANCE

Proper cleaning and storage are crucial for maintaining the longevity and hygiene of your Fleshlight Ice Lady.

1. **Cleaning After Each Use:**

- Remove the SuperSkin sleeve from the casing.
- Rinse the sleeve thoroughly with warm water.
- Use a water-based cleaner, such as Fleshwash Anti-bacterial cleaner, to clean the sleeve. *Do not use soap, as it can damage the SuperSkin material.*
- Rinse again to remove all cleaner residue.

2. **Drying:** Gently pat the sleeve dry with a lint-free cloth or allow it to air dry completely. Ensure no

moisture remains before storage to prevent bacterial growth.

3. **Storage:** Once completely dry, re-insert the sleeve into its casing and secure the end-cap. Store the device in a clean, dry place, such as a drawer, away from direct sunlight or extreme temperatures. This prevents dust and dirt from accumulating.

Image 3: Demonstrating the easy removal and cleaning of the SuperSkin sleeve.

5. TROUBLESHOOTING

- **Reduced Suction:** Ensure the end-cap is securely tightened. If suction remains weak, check the sleeve for any tears or damage that might compromise the seal.
- **Difficulty Cleaning:** Always remove the sleeve from the casing for thorough cleaning. Use only recommended water-based cleaners. If residue persists, a soft brush designed for cleaning intricate textures may be helpful.
- **Material Degradation:** Avoid using oil-based lubricants or harsh soaps, as these can degrade the SuperSkin material over time. If the material feels sticky or has lost its original texture, ensure proper cleaning and consider using Fleshlight Renewing Powder (sold separately) to restore its feel.

6. SPECIFICATIONS

Feature	Detail
Brand	Fleshlight
Model Name	Ice Lady (Crystal Lady Male Masturbator)
Item Model Number	708
Color	Clear
Material	SuperSkin
Product Dimensions	6 x 2 x 8 inches
