Zodiac 9-100-3101

Zodiac 9-100-3101 Feed Hose Complete User Manual

Brand: Zodiac | Model: 9-100-3101

INTRODUCTION

This manual provides instructions for the Zodiac 9-100-3101 Feed Hose, a replacement component designed for the Zodiac Polaris 360 Vac-Sweep Black Max Pool Cleaner. It includes a universal wall fitting and is black in color. This hose does not include a back-up valve.

PRODUCT OVERVIEW

The Zodiac 9-100-3101 Feed Hose is an essential part of your automatic pool cleaning system, ensuring proper water flow to the cleaner for efficient operation. It is specifically engineered for compatibility with the specified Polaris model.

Key Features:

- Complete feed hose replacement
- Designed for Zodiac Polaris Black Max pool cleaner model Vac-Sweep 360
- Includes universal wall fitting
- Does not include a back-up valve
- Black color

SETUP AND INSTALLATION

Follow these general steps for installing the feed hose. Always consult your Zodiac Polaris 360 Vac-Sweep Black Max Pool Cleaner's specific manual for detailed instructions and safety precautions.

1. **Preparation:** Ensure your pool cleaner system is turned off and disconnected from any power source.
2. **Remove Existing Hose (if applicable):** Carefully disconnect the old feed hose from both the pool cleaner and the universal wall fitting.
3. **Connect to Cleaner:** Attach one end of the new Zodiac 9-100-3101 Feed Hose to the designated water inlet on your Zodiac Polaris 360 Vac-Sweep Black Max Pool Cleaner. Twist or push firmly to ensure a secure, watertight connection.
4. **Connect Universal Wall Fitting:** Attach the other end of the feed hose to the universal wall fitting provided.
5. **Install Wall Fitting:** Secure the universal wall fitting into the pool's return line or the dedicated wall port for your cleaner.

6. **Check for Leaks:** After all connections are made, turn on the pool cleaner system. Observe all connection points for any signs of water leakage. Tighten connections as needed to prevent leaks.

OPERATING INSTRUCTIONS

The Zodiac 9-100-3101 Feed Hose functions as a conduit for water, enabling your pool cleaner to operate. Its proper functioning is integral to the overall performance of your Zodiac Polaris 360 Vac-Sweep Black Max Pool Cleaner.

- Ensure the feed hose is laid out in the pool without kinks or severe bends that could impede water flow to the cleaner.
- Verify that the universal wall fitting remains securely in place during cleaner operation.
- Periodically observe the hose during cleaner cycles to ensure it does not become excessively tangled, which could restrict cleaner movement.
- The hose's length (approximately 26 feet or 7.9 meters) is designed to provide adequate reach for the cleaner across most pool surfaces.

MAINTENANCE

Regular maintenance of your feed hose will help prolong its life and ensure consistent performance of your pool cleaner.

- **Inspection:** Routinely inspect the entire length of the hose for any signs of wear, such as cracks, cuts, abrasions, or punctures. Damaged hoses should be replaced promptly.
- **Kink Prevention:** Avoid creating sharp bends or kinks in the hose, especially during storage, as this can stress the material and lead to premature failure.
- **Cleaning:** If the hose accumulates dirt or debris, it can be cleaned using a soft brush, mild soap, and water. Rinse thoroughly to remove all soap residue.
- **Storage:** When the pool cleaner and hose are not in use for extended periods, store the hose in a cool, dry location away from direct sunlight and extreme temperatures. Coil the hose loosely to prevent kinking.
- **Connection Integrity:** Periodically check that the connections to the cleaner and the wall fitting remain tight and secure.

TROUBLESHOOTING

This section addresses common issues related to the feed hose. For problems concerning the pool cleaner's internal mechanisms, refer to your cleaner's dedicated manual.

Issue: Reduced Cleaner Performance or No Movement

- **Check for Kinks:** Inspect the entire hose for any kinks or sharp bends that might be restricting water flow. Straighten the hose if necessary.
- **Obstructions:** Disconnect the hose and visually inspect its interior for any foreign objects or debris that could be blocking water passage.
- **Connection Leaks:** Verify that all connections (to the cleaner and wall fitting) are secure and free of leaks. Leaks can lead to a loss of water pressure, affecting cleaner performance.
- **Hose Damage:** Look for any visible cracks, holes, or severe wear on the hose itself. A damaged hose will require replacement.

Issue: Water Leaking from Hose Connections

- **Tighten Connections:** Ensure the hose is firmly and correctly attached to both the pool cleaner and the universal wall fitting.
- **Inspect Fittings:** Check the universal wall fitting and the cleaner's inlet port for any damage, cracks, or worn seals.

that might be causing the leak.

SPECIFICATIONS

Attribute	Detail
Product Name	Feed Hose Complete with Universal Wall Fitting
Model Number	9-100-3101
Brand	Zodiac
Compatibility	Zodiac Polaris 360 Vac-Sweep Black Max Pool Cleaner
Includes	Feed Hose, Universal Wall Fitting
Excludes	Back up valve
Color	Black
Material	Plastic, Rubber
Approximate Hose Length	26 feet (7.9 meters)
Item Weight	7.2 pounds
Packaging Dimensions	22.75 x 22 x 4.5 inches

WARRANTY INFORMATION

Specific warranty terms and conditions for the Zodiac 9-100-3101 Feed Hose are typically provided with the product packaging or at the time of purchase. It is recommended to retain your proof of purchase for any warranty claims. For general warranty policies or to inquire about specific coverage, please refer to the official Zodiac website or contact their customer support directly.

Please note that any extended protection plans offered by retailers are separate from the manufacturer's warranty.
