2. SAFETY INFORMATION

Always observe the following safety precautions to prevent injury or damage to the product:

- Installation must be performed by a qualified professional in accordance with local plumbing and building codes.
- Ensure the water supply is turned off before beginning any installation or maintenance work.
- Do not use abrasive cleaners, solvents, or harsh chemicals on the product as they can damage the finish.
- Protect the product from freezing temperatures.
- Check all connections for leaks after installation.

3. PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- Wall-mounted bath mixer unit
- Hand shower
- Shower hose
- Wall bracket for hand shower
- Mounting hardware (screws, anchors, gaskets)
- Instruction manual

4. SPECIFICATIONS

Brand	Dornbracht
Model Number	25133892-00
Finish Type	Polished
Handle Material	Brass
Mounting Type	Wall Mount
Item Weight	5.01 Kilograms
Included Components	Shower Arm, Shower Head (Note: This refers to the hand shower and its components)
Material	Brass

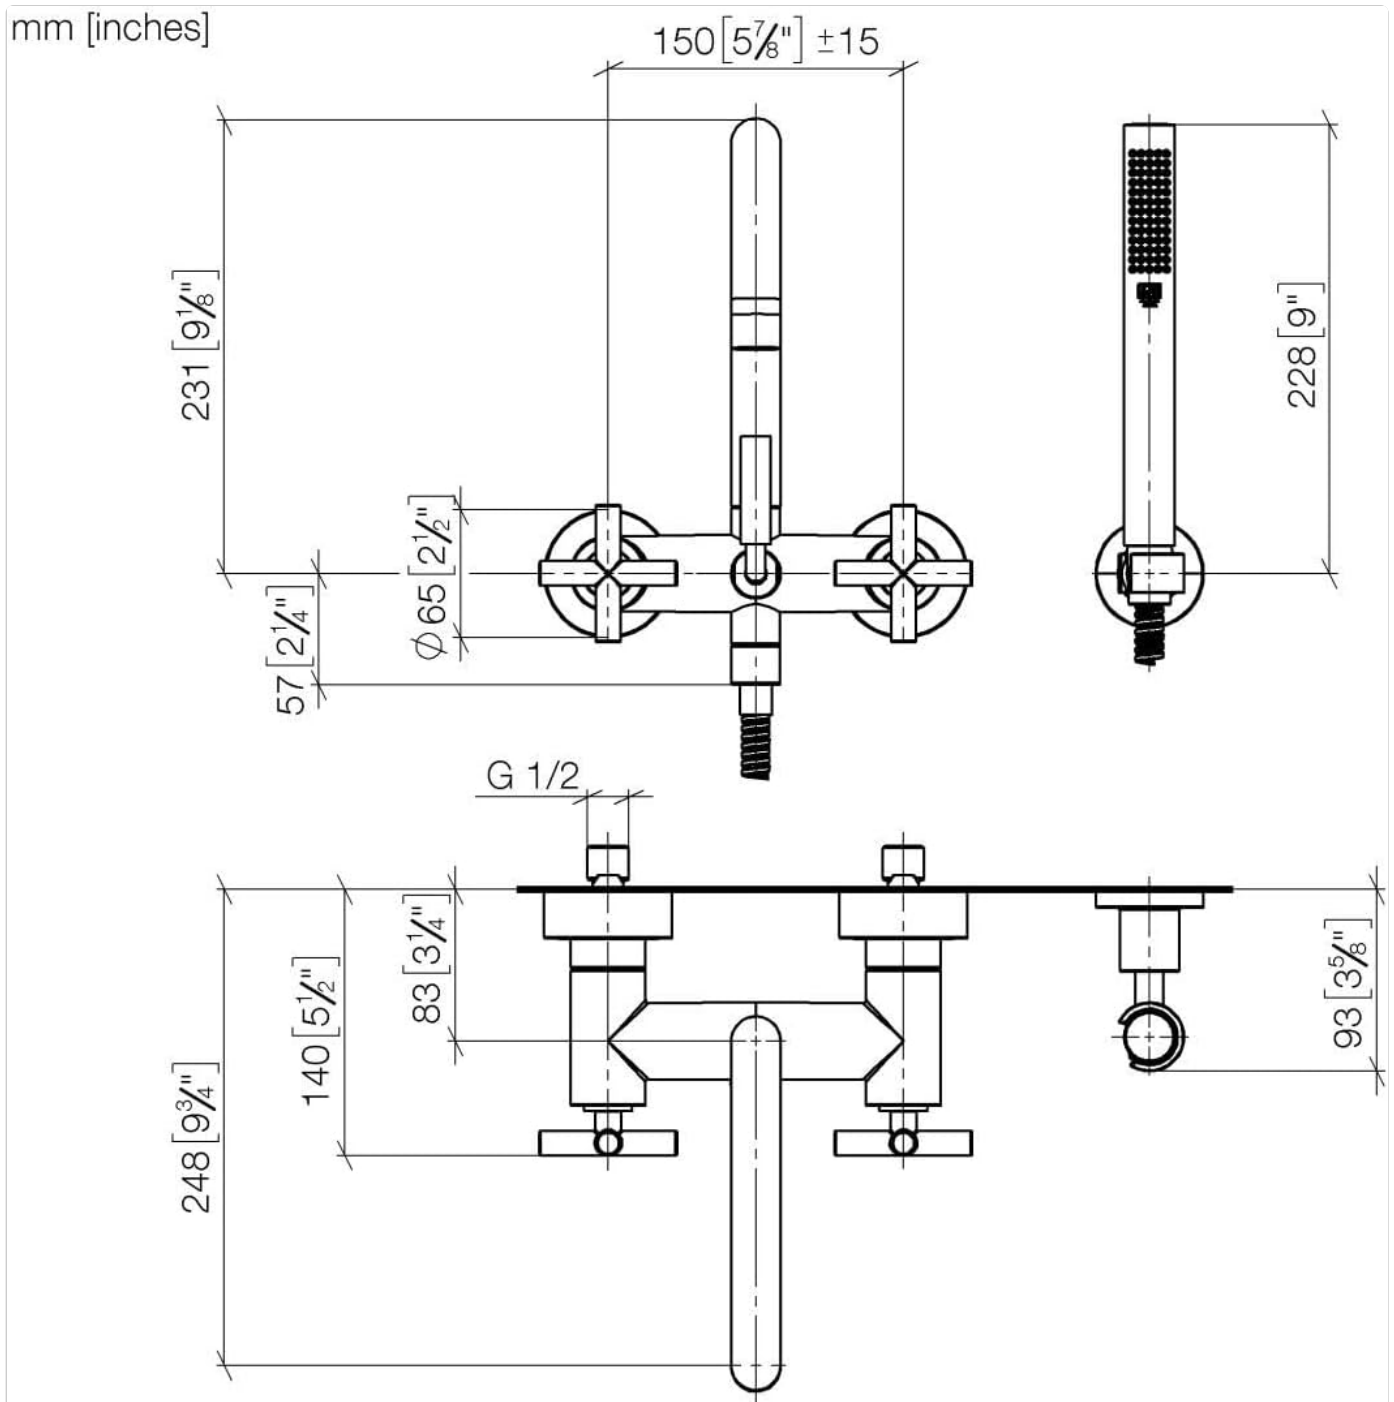

Image 4.1: Dimensional drawing showing key measurements for installation planning. All dimensions are in millimeters and inches.

5. SETUP & INSTALLATION

Tools Required: Adjustable wrench, pipe sealant tape, screwdriver, drill, level, measuring tape.

5.1 Pre-Installation

- Ensure rough-in plumbing is correctly positioned according to the dimensional drawing (Image 4.1).
- Flush water lines to remove any debris before connecting the mixer.
- Inspect all components for damage. Do not install damaged parts.

5.2 Mixer Installation

1. Turn off the main water supply.
2. Apply pipe sealant tape to the threaded ends of the water supply pipes extending from the wall.

3. Attach the eccentric connectors (if supplied and required) to the water supply pipes, adjusting them to the correct spacing for the mixer body. Ensure they are level.
4. Place the gaskets onto the eccentric connectors.
5. Carefully align the mixer body with the eccentric connectors and tighten the nuts using an adjustable wrench. Do not overtighten.
6. Attach the decorative escutcheons (cover plates) to the wall, covering the connections.

5.3 Hand Shower Installation

1. Determine the desired height and position for the hand shower wall bracket. Mark the drilling points.
2. Drill holes and insert wall anchors if necessary.
3. Secure the wall bracket (3) to the wall using the provided screws.
4. Connect one end of the shower hose to the outlet on the bath mixer (2) and the other end to the hand shower (5). Ensure gaskets are in place and connections are hand-tightened, then gently snug with a wrench.
5. Place the hand shower into its wall bracket.

5.4 Post-Installation

- Slowly turn on the main water supply.
- Check all connections for leaks. Tighten gently if necessary.
- Test the function of the mixer and hand shower.

6. OPERATING INSTRUCTIONS

The Dornbracht 25133892-00 bath mixer features two cross-handle controls for water flow and temperature, and a diverter to switch between the bath spout and hand shower.

- **Water Flow:** Turn the left handle (typically for hot water) and the right handle (typically for cold water) to adjust the water flow.
- **Temperature Control:** Mix hot and cold water by adjusting both handles until the desired temperature is achieved.
- **Diverter:** To switch water flow from the bath spout to the hand shower, pull the diverter knob located on the mixer body. Push it back down to return flow to the bath spout.
- **Hand Shower Use:** Remove the hand shower from its bracket and press the button or lever on the hand shower head to activate the spray.

7. MAINTENANCE

Regular cleaning and maintenance will ensure the longevity and appearance of your Dornbracht bath mixer.

7.1 Cleaning the Finish

- Clean the surface with a soft, damp cloth and mild soap.
- Rinse thoroughly with clean water and dry with a soft cloth to prevent water spots.
- *Do not use abrasive cleaners, scouring pads, ammonia-based cleaners, or cleaners containing alcohol, bleach, or acid, as these can damage the polished finish.*

7.2 Cleaning the Hand Shower Nozzles

- Over time, mineral deposits may accumulate in the hand shower nozzles.
- Gently rub the rubber nozzles with your finger or a soft brush to dislodge any buildup.
- For stubborn deposits, a solution of white vinegar and water can be used, but ensure to rinse thoroughly afterwards.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Low Water Flow	<ul style="list-style-type: none">Partially closed shut-off valvesClogged aerator/nozzlesDebris in water lines	<ul style="list-style-type: none">Ensure shut-off valves are fully open.Clean hand shower nozzles (see Maintenance).Flush water lines (consult a plumber if necessary).
Leaks at Connections	<ul style="list-style-type: none">Loose connectionsDamaged gasketsInsufficient pipe sealant tape	<ul style="list-style-type: none">Gently tighten connections.Replace damaged gaskets.Reapply pipe sealant tape and reassemble.
Diverter Not Working	<ul style="list-style-type: none">Mineral buildupInternal mechanism issue	<ul style="list-style-type: none">Operate the diverter several times to dislodge buildup.If problem persists, contact customer support or a qualified plumber.
