Dornbracht Wall-Mounted Bath Mixer

Model: 25133892-08

INTRODUCTION

This manual provides essential information for the safe installation, operation, and maintenance of your Dornbracht 25133892-08 Wall-Mounted Bath Mixer. Please read these instructions carefully before installation and retain them for future reference. Proper installation and care will ensure optimal performance and longevity of your product.

SAFETY INSTRUCTIONS

- **Professional Installation:** Installation should only be performed by a qualified plumber or technician in accordance with local plumbing and building codes.
- **Water Supply:** Ensure the main water supply is turned off before beginning any installation or maintenance work.
- **Water Pressure:** Verify that the water pressure in your system is within the recommended limits for this product to prevent damage or malfunction.
- **Hot Water Temperature:** Exercise caution when adjusting hot water temperature to prevent scalding. Consider installing a thermostatic mixing valve if not already present.
- **Cleaning:** Use only mild, non-abrasive cleaning agents. Harsh chemicals can damage the finish. Refer to the 'Care and Maintenance' section for detailed cleaning instructions.

PACKAGE CONTENTS

Carefully unpack the product and check that all components are present and undamaged. If any parts are missing or damaged, contact your supplier immediately.

INSTALLATION INSTRUCTIONS

Before You Begin

- Ensure you have all necessary tools: adjustable wrench, pipe sealant/Teflon tape, level, drill, measuring tape, screwdriver.
- Turn off the main water supply to your home.
- Clear the installation area and protect surfaces from damage.

Mounting the Mixer

1. **Prepare Wall Connections:** Ensure the hot and cold water supply lines are correctly positioned and spaced according to the mixer's dimensions (refer to Figure 2). The standard distance between centers is typically 150mm (5 7/8 inches).
2. **Install Eccentric Connectors:** Apply pipe sealant or Teflon tape to the threaded ends of the eccentric connectors. Screw them into the wall water supply outlets. Adjust them until the correct spacing and depth are achieved, ensuring they are level.
3. **Attach Rosettes/Escutcheons:** Slide the decorative rosettes over the eccentric connectors, flush against the wall.
4. **Mount Mixer Body:** Place the gaskets onto the eccentric connectors. Carefully align the mixer body with the connectors and tighten the nuts using an adjustable wrench. Do not overtighten.
5. **Install Hand Shower Holder:** Choose a suitable location on the wall for the hand shower holder, ensuring it is

within easy reach. Mark and drill holes, insert anchors, and secure the holder with screws.

- 6. **Connect Hand Shower:** Attach the hand shower hose to the outlet on the mixer body and to the hand shower. Ensure all connections are hand-tightened, then use a wrench for a final snug fit, being careful not to damage the finish.
- 7. **Test for Leaks:** Slowly turn on the main water supply. Check all connections for leaks. If leaks are detected, turn off the water and re-tighten the connections.

OPERATING YOUR BATH MIXER

Water Flow and Temperature Control

- The mixer features three handles. Typically, one handle controls the hot water flow, another controls the cold water flow, and the central handle may control the diverter or overall flow.
- Turn the hot and cold handles to adjust the desired water temperature and flow rate from the spout.

Hand Shower Function

- To divert water from the bath spout to the hand shower, operate the central diverter handle or button, if present.
- Ensure the hand shower is securely placed in its holder when not in use.

CARE AND MAINTENANCE

Cleaning

- Clean the mixer regularly with a soft cloth and mild soap or a non-abrasive liquid cleaner specifically designed for bathroom fixtures.
- Avoid using abrasive cleaners, scouring pads, ammonia-based products, or cleaners containing alcohol, acids, or harsh chemicals, as these can damage the finish.
- Rinse thoroughly with clean water after cleaning and dry with a soft cloth to prevent water spots.

Descaling

If mineral deposits (limescale) accumulate, especially on the showerhead nozzles, gently rub them with your finger or a soft brush. For stubborn deposits, use a descaling solution specifically formulated for bathroom fixtures, following the product's instructions carefully. Ensure the solution does not remain on the mixer's finish for extended periods.

TROUBLESHOOTING GUIDE

Before contacting customer service, please refer to the following table for common issues and their solutions.

Problem	Possible Cause	Solution
Water leaks from connections	Loose connections, damaged gaskets, insufficient sealant.	Turn off water supply. Tighten connections. Replace damaged gaskets. Reapply pipe sealant/Teflon tape.
Low water flow	Clogged aerator, low water pressure, kinked hose.	Remove and clean aerator. Check main water supply valve. Inspect hand shower hose for kinks.

Water temperature inconsistent	Issues with hot/cold water supply, water heater settings.	Check water heater settings. Ensure both hot and cold water supplies are fully open.
Hand shower not diverting water	Diverter mechanism stuck or faulty.	Operate diverter several times. If issue persists, professional inspection may be required.

WARRANTY AND CUSTOMER SUPPORT

Dornbracht products are manufactured to high-quality standards and come with a manufacturer's warranty against defects in materials and workmanship. The specific terms and duration of your warranty may vary by region and product. Please retain your proof of purchase for warranty claims.

For technical assistance, spare parts, or warranty inquiries, please contact your authorized Dornbracht dealer or visit the official Dornbracht website for customer support information.
