Image 3.1: Fit Guide for Scosche GM2500B, detailing compatible GM vehicle models and years.

The kit accommodates both Single DIN and Double DIN aftermarket stereos. Double DIN dash kits are designed for true Double DIN stereos with a maximum screen opening of 96.8mm x 173mm (3-13/16 inches x 6-13/16 inches). Some radios labeled as Double DIN may be oversized and could require minor trimming of the kit for a proper fit.

All Scosche Single/Double Din kits have an industry standard sized opening, for standard radio sizes. Some oversized car radios are listed as Single or Double DIN and may require minor trimming of the kit to make them fit. Please check the dimensions of your stereo to verify it will fit, prior to purchasing.

All Scosche Dash Kits are Vehicle Specific. Use the Fit Guide Image on this listing to verify that your vehicle's Make, Model and Year is supported.

4. INSTALLATION INSTRUCTIONS

Follow these steps for the proper installation of your Scosche GM2500B Dash Kit and aftermarket stereo. Refer to the video below for a visual guide on the installation process.

4.1. Preparation

- 1. Disconnect Battery:** Before starting any electrical work, disconnect the negative battery terminal of your vehicle to prevent electrical shorts or damage.
- 2. Review Instructions:** Carefully read the entire instruction manual provided with the dash kit and your new aftermarket stereo.
- 3. Identify Unused Tabs:** Based on your specific vehicle and stereo application, identify and remove any tabs on the mounting brackets that will not be used. These tabs are designed to be broken off cleanly.

4.2. Factory Radio Removal

The process for removing your factory radio varies by vehicle. Consult your vehicle's service manual or the specific radio removal instructions included with your dash kit for detailed steps.

- 4. Remove Trim Panels:** Use a panel removal tool to carefully pry off any trim panels surrounding the

factory radio.

5. **Unscrew Factory Radio:** Locate and remove the screws securing the factory radio in place.
6. **Unplug Harnesses:** Gently pull the factory radio out and disconnect all electrical harnesses and antenna cables from the back.

4.3. Dash Kit Assembly and New Radio Installation

7. **Assemble Dash Kit:** Attach the appropriate mounting brackets to your new aftermarket stereo using the screws provided with the stereo. Ensure the brackets are securely fastened.
8. **Connect Wiring:** Connect the vehicle's wiring harness to the radio's harness. If an interface module is required (sold separately), connect it according to its instructions.
9. **Install New Stereo:** Slide the assembled stereo and dash kit into the vehicle's dash opening. Secure it with the screws removed earlier.
10. **Reinstall Trim Panels:** Carefully reattach all trim panels, ensuring they snap securely into place.
