Cooper-Atkins TM60-0-8

Cooper-Atkins TM60-0-8 Mechanical Timer Instruction Manual

Model: TM60-0-8

1. INTRODUCTION

The Cooper-Atkins TM60-0-8 is a robust mechanical timer designed for reliable time management in various environments, from professional kitchens to home use. This timer features a durable stainless steel construction and a clear, easy-to-read dial. It is engineered for straightforward operation and provides an audible alarm upon completion of the set time.

2. KEY FEATURES

- **One-Handed Operation:** Designed for ease of use, allowing quick setting with a single hand.
- **Stainless Steel Case:** Provides durability and a professional appearance, resistant to corrosion.
- **8-Second Alarm:** Features a distinct, long-ringing alarm to ensure it is heard.
- **Easy-to-Read Dial:** Clear markings for precise time setting and monitoring.
- **Non-Skid Rubber Feet:** Ensures stability on various surfaces, preventing accidental movement.

3. SETUP

The Cooper-Atkins TM60-0-8 mechanical timer requires no batteries or complex assembly. Simply remove it from its packaging and place it on a stable, flat surface. The non-skid rubber feet on the base will help keep it securely in place during operation.

4. OPERATING INSTRUCTIONS

To ensure accurate timing and a proper alarm ring, follow these steps carefully:

1. **Wind Fully:** Turn the dial clockwise all the way to the 55-minute mark (or slightly past the 30-minute mark if your desired time is less than 30 minutes). This action fully winds the internal spring mechanism, which is essential for the timer to function correctly and for the alarm to sound.
2. **Set Desired Time:** After fully winding, turn the dial counter-clockwise to the desired time setting. The timer can be set for any duration from 1 minute up to 60 minutes.
3. **Start Timing:** The timer will begin counting down immediately after setting the desired time.
4. **Alarm:** Once the set time has elapsed, the timer will emit an 8-second long ring to alert you.

Important Note: Failing to fully wind the timer before setting the desired time may result in the timer not operating or the alarm not sounding properly.

Figure 4: Top view of the timer, illustrating the clear dial for setting time.

5. MAINTENANCE AND CARE

- **Cleaning:** Wipe the exterior of the timer with a soft, damp cloth. Do not immerse the timer in water or use abrasive cleaners, as this can damage the internal mechanism.
- **Storage:** Store the timer in a dry environment away from extreme temperatures or direct heat sources.
- **Handling:** Avoid dropping the timer or subjecting it to strong impacts, which could affect its accuracy and functionality.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Timer does not start or stops prematurely.	Timer was not fully wound before setting.	Ensure the dial is turned clockwise past the 30-minute mark (or to 55 minutes) before setting the desired time counter-clockwise.
Alarm does not sound or is very faint.	Insufficient winding of the internal spring.	Always fully wind the timer to 55 minutes before setting the desired countdown time.
Timer is inaccurate.	Internal mechanism damage from impact or wear.	Ensure proper handling and avoid dropping. If issues persist after proper winding, contact customer support.

7. SPECIFICATIONS

Attribute	Detail
Model Number	TM60-0-8
Brand	Cooper-Atkins
Material	Stainless Steel
Color	Silver
Product Dimensions (D x W x H)	1.28"D x 1.38"W x 1.57"H
Item Weight	1.76 ounces (0.11 Pounds)
Unit Range	0 to 60 Minutes
Alarm Duration	8 seconds
UPC	070131060020
