Cambro CD1327110

Cambro Camdolly CD1327110 Milk Crate Dolly User Manual

Model: CD1327110 | Brand: Cambro

Product Overview

The Cambro Camdolly CD1327110 is a durable, black plastic dolly designed for efficient transport of 13" x 13" milk crates and #10 can cases. Constructed from robust plastic, it resists denting, cracking, rusting, and corrosion, ensuring a long service life in demanding environments. This dolly features four 3-inch swivel casters for easy maneuverability and is NSF certified for sanitation and safety.

Setup and Assembly

The Cambro Camdolly CD1327110 typically arrives pre-assembled and ready for immediate use. No complex assembly steps are required. Upon unboxing, inspect the dolly for any signs of shipping damage. Ensure all four casters are securely attached and rotate freely.

1. **Unpack:** Carefully remove the dolly from its packaging.
2. **Inspect:** Check the plastic body for cracks or damage. Verify that the four 3-inch swivel casters are firmly in place and move smoothly.
3. **Placement:** Position the dolly on a flat, stable surface before loading.

Operating Instructions

This dolly is designed for simple and efficient transport of standard 13" x 13" milk crates or #10 can cases.

- **Loading:** Place the milk crate(s) or #10 can cases onto the dolly's platform. Ensure the load is centered and stable to prevent tipping during transport. The interior dimensions are 13 11/16"W x 26 3/4"D, accommodating two standard 13"x13" milk crates side-by-side or similar sized items.
- **Weight Capacity:** Do not exceed the maximum load capacity of 300 lbs (136 kg). Overloading can damage the dolly and casters, and may lead to instability.
- **Movement:** Push or pull the dolly using appropriate handles on the crates or the items themselves. The swivel casters allow for easy navigation in various directions.
- **Surface:** Operate the dolly on smooth, level surfaces for optimal performance and safety. Avoid uneven terrain, stairs, or steep inclines.

Maintenance

Regular maintenance ensures the longevity and optimal performance of your Cambro Camdolly.

- **Cleaning:** Clean the dolly regularly with mild soap and water. Rinse thoroughly and allow to air dry. The durable plastic material is easy to sanitize.
- **Caster Inspection:** Periodically check the casters for debris (e.g., string, hair, dirt) that may impede rotation. Remove any obstructions. Ensure casters are securely fastened to the dolly.
- **Storage:** Store the dolly in a clean, dry area when not in use. Avoid prolonged exposure to extreme temperatures or direct sunlight, which could potentially degrade the plastic over time.

Troubleshooting

If you encounter issues with your Camdolly, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Dolly is difficult to move or steer.	Casters are obstructed by debris or damaged.	Inspect casters for debris (e.g., string, hair). Clean them thoroughly. If casters are damaged, contact Cambro support for replacement parts.
Dolly tips easily.	Overloaded or unevenly distributed load.	Reduce load to stay within 300 lbs capacity. Redistribute items to ensure the load is centered and stable.
Dolly makes unusual noises.	Casters may need cleaning or lubrication.	Clean casters. A small amount of food-grade lubricant can be applied to caster axles if noise persists, ensuring it does not contaminate food contact surfaces.

Specifications

Feature	Detail
Model Number	CD1327110
Brand	Cambro
Material	Durable Plastic
Color	Black
