Pursonic S1

Pursonic Portable UV Toothbrush Sanitizer Case S1 User Manual

Brand: Pursonic

Model: S1

INTRODUCTION

The Pursonic Portable UV Toothbrush Sanitizer Case (Model S1) is designed to provide a clean and organized environment for your toothbrush. Utilizing UV light technology, this compact and lightweight device helps maintain the hygiene of both manual and most electric toothbrush heads. Its automatic operation and battery-powered design make it suitable for various settings, including home, travel, dorm rooms, or office use.

KEY FEATURES

- **Efficient UV Light Technology:** Features UV light designed to support cleanliness for your toothbrush.
- **Durable UV Bulbs:** Equipped with long-lasting UV light bulbs for consistent performance.
- **Portable Design:** Compact and lightweight, suitable for home, travel, dorm rooms, or office use.
- **Wide Compatibility:** Accommodates all manual toothbrushes and most electric toothbrush heads.
- **Automatic Operation:** UV light activates automatically when a toothbrush is inserted and turns off after five minutes.
- **Battery-Operated:** Runs on 2 x 1.5V AA batteries (not included) for enhanced portability.

Compact & Lightweight

Ideal for Home, Travel, Dorm Rooms, or Office Use

Image: The compact Pursonic UV Toothbrush Sanitizer Case being placed into a travel bag, highlighting its portability.

SETUP

1. **Install Batteries:** Open the battery compartment on the back of the unit. Insert two (2) 1.5V AA batteries, ensuring correct polarity. Close the battery compartment securely.
2. **Prepare Toothbrush:** After brushing, rinse your toothbrush thoroughly to remove any toothpaste residue.
3. **Place Toothbrush:** Open the sanitizer case. Carefully place your toothbrush head into the designated holder inside the case. Ensure the bristles are facing the UV light.
4. **Close Case:** Close the lid of the sanitizer case firmly. The UV light will automatically activate.

This Advanced Toothbrush Holder

Features UV light technology designed to support cleanliness and organization for your toothbrush

OPERATING INSTRUCTIONS

The Pursonic UV Toothbrush Sanitizer operates automatically once a toothbrush is properly placed inside and the lid is closed.

- **Automatic Activation:** Upon closing the case with a toothbrush inside, the UV light will automatically turn on. A small indicator light on the exterior of the case may illuminate to confirm operation.
- **Sanitization Cycle:** The UV light will remain active for approximately five (5) minutes to complete the sanitization cycle.
- **Automatic Shut-off:** After the five-minute cycle, the UV light will automatically turn off. The indicator light will also extinguish.
- **Retrieving Toothbrush:** Once the light has turned off, you can open the case and remove your sanitized toothbrush.

MAINTENANCE

- **Cleaning the Case:** Wipe the exterior and interior of the sanitizer case with a soft, damp cloth. Do not use abrasive cleaners or immerse the unit in water. Ensure the unit is dry before closing or inserting batteries.
- **Battery Replacement:** When the indicator light no longer illuminates or the UV light appears dim, it is time to replace the batteries. Open the battery compartment and replace the two (2) AA batteries with new ones. Dispose of old batteries responsibly.
- **UV Bulb Longevity:** The UV bulbs are designed for long-lasting performance. If you suspect a bulb is not functioning, contact customer support.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
UV light does not turn on.	1. Batteries are dead or incorrectly installed. 2. Case lid is not fully closed.	1. Replace batteries with new 1.5V AA batteries, ensuring correct polarity. 2. Ensure the lid is securely latched.
Toothbrush does not fit.	Toothbrush head is too large or has an unusual shape.	The sanitizer is compatible with most standard manual and electric toothbrush heads. Verify your toothbrush head size.
