August DVB-T202

August DVB-T202 USB Freeview TV Tuner User Manual

Model: DVB-T202

INTRODUCTION

This manual provides comprehensive instructions for the installation, operation, and maintenance of your August DVB-T202 USB Freeview TV Tuner. This device allows you to watch and record digital terrestrial television (DVB-T) on your Windows PC without an internet connection.

PACKAGE CONTENTS

Before proceeding with the installation, please ensure all components are present in the package:

- August DVB-T202 USB Freeview TV Tuner Stick
- Portable Antenna with Magnetic Base

- Quick Start Guide
- Software Installation CD (Mini-CD)

In the box

Image: A flat lay of the August DVB-T202 product box and its contents, including the USB tuner, portable antenna, quick start guide, and software mini-CD.

SETUP GUIDE

Follow these steps to set up your DVB-T202 TV Tuner:

1. **System Requirements:** Ensure your PC meets the minimum requirements: Windows 11, 10, 8, 7, Vista, or XP. A USB 2.0 port is required.
2. **Software Installation:**
 - Insert the provided mini-CD into your PC's CD/DVD drive. If your drive is a slot-loading type, do not use the mini-CD; instead, download the software and drivers from the official August website.
 - Follow the on-screen instructions to install the TV viewing software and necessary drivers.

3. Connect the Tuner:

- Plug the August DVB-T202 USB TV Tuner into an available USB 2.0 port on your computer.
- Connect the portable antenna to the antenna input port on the DVB-T202. For optimal reception, position the antenna near a window or use a rooftop aerial connected via the standard antenna port.

Record TV

Save movies and broadcasts to your hard drive

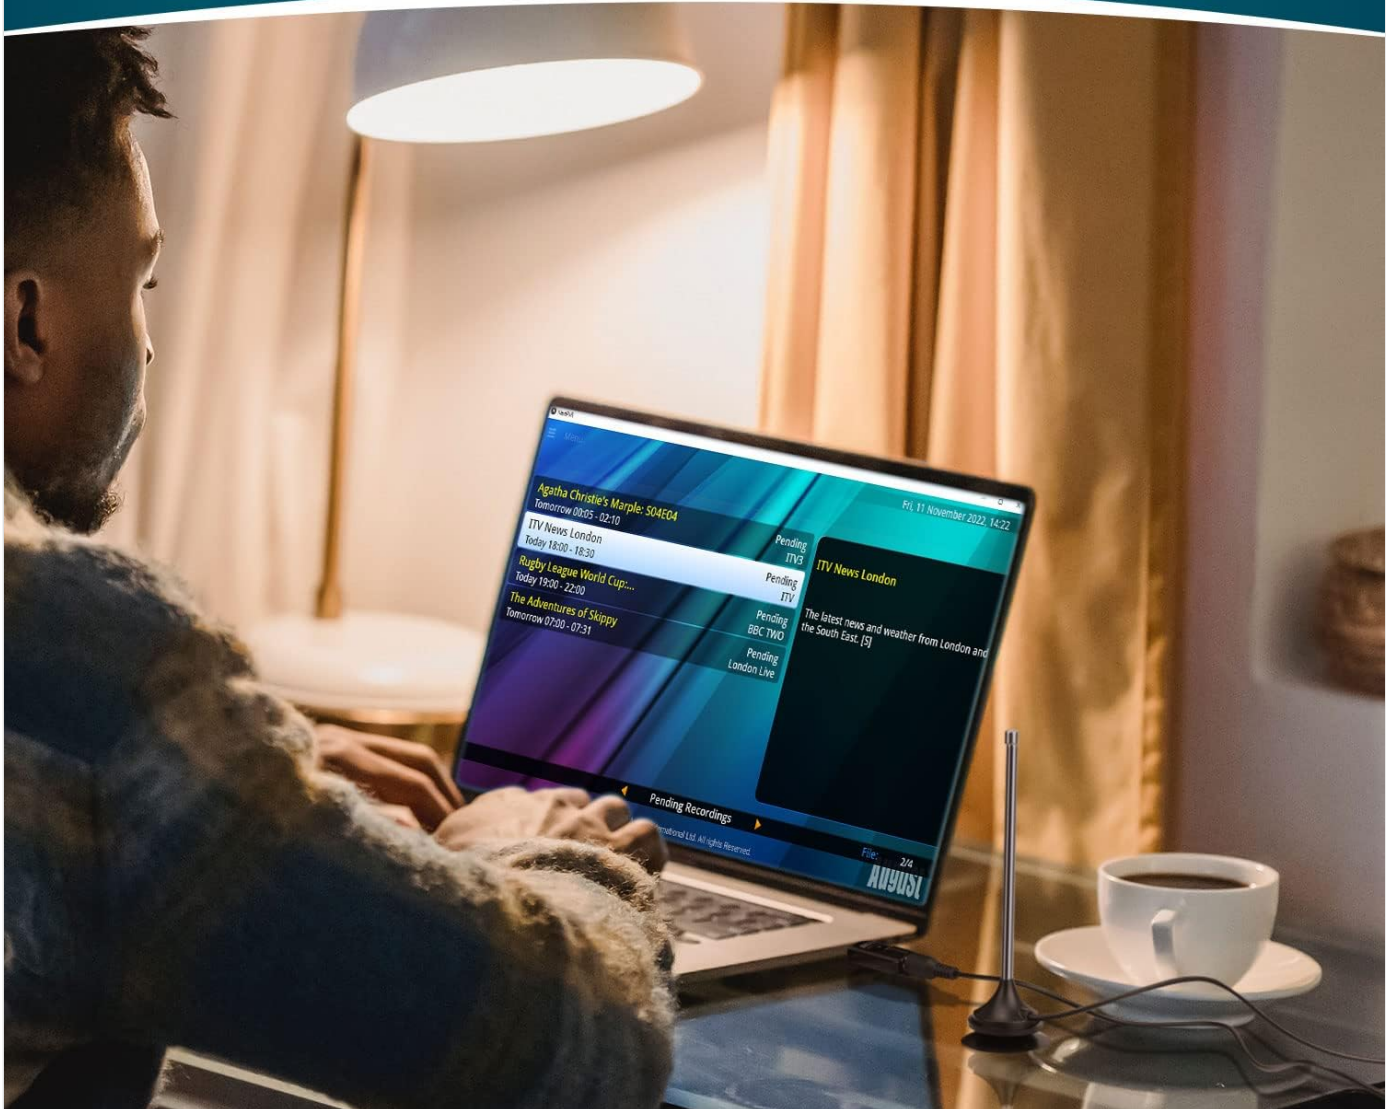

Image: A diagram illustrating how the August DVB-T202 USB tuner can connect to either the included portable aerial or a traditional rooftop aerial for improved signal reception.

OPERATING INSTRUCTIONS

Once the software is installed and the tuner is connected, you can begin watching and recording TV.

1. Launching the Software

Open the installed TV viewing application from your desktop shortcut or Start Menu. The software will typically guide you through an initial channel scan.

2. Channel Scan

Perform a channel scan to find available digital TV channels in your area. This process may take several minutes. Ensure your antenna is properly positioned for best results.

3. Watching Live TV

After the scan, select a channel from the channel list to start watching live television. You can switch channels using the software interface.

4. Electronic Program Guide (EPG)

The software includes an Electronic Program Guide (EPG) that displays upcoming programs. Use the EPG to browse schedules and plan your viewing.

5. Recording TV Programs

The DVB-T202 supports live and scheduled recording. You can record programs directly to your computer's hard drive or an external storage device.

- **Live Recording:** Click the record button within the software interface while watching a program to start recording immediately.
- **Scheduled Recording:** Use the EPG to select a future program and set a recording schedule. Ensure your PC is on

or in a compatible sleep mode for scheduled recordings to function.

Traditional Antenna Port

Can use the portable aerial or a rooftop aerial

MAINTENANCE

To ensure the longevity and optimal performance of your August DVB-T202:

- **Cleaning:** Use a soft, dry cloth to clean the tuner stick. Do not use liquid cleaners or solvents.
- **Storage:** When not in use, store the tuner in a cool, dry place, away from direct sunlight and extreme temperatures. Keep the protective cap on the USB connector.
- **Software Updates:** Periodically check the August official website for software and driver updates to ensure compatibility with the latest operating systems and to improve performance.

TROUBLESHOOTING

If you encounter issues with your DVB-T202, refer to the following common problems and solutions:

Problem	Possible Cause / Solution
No channels found during scan.	<ul style="list-style-type: none">• Ensure the antenna is securely connected and properly positioned. Try moving the antenna to different locations, especially near a window.• Verify that DVB-T signals are available in your area.• If using an indoor antenna, consider connecting to a rooftop aerial for stronger signal.• Check for obstructions that might block the signal.
Poor picture quality or freezing.	<ul style="list-style-type: none">• Weak signal strength. Adjust antenna position or use a stronger antenna.• Interference from other electronic devices. Move the tuner away from other electronics.• Ensure your PC meets the recommended system requirements for smooth playback.
Software not recognizing the tuner.	<ul style="list-style-type: none">• Reinstall the drivers and software from the provided CD or the August website.• Try a different USB port on your PC.• Ensure your operating system is up to date.
Mini-CD not readable or causing issues.	<ul style="list-style-type: none">• Do not use the mini-CD with slot-loading CD/DVD drives.• Download the latest software and drivers directly from the official August support website.
