To open a drawer, gently pull the top edge of the drawer front. To close, push the drawer firmly until it is fully seated. Avoid forcing drawers open or closed to prevent damage to the glides.

Maintenance

- **Cleaning:** Wipe the dresser surfaces with a damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the foil finish.
- **Scratch Resistance:** The foil finish is designed to be scratch resistant, but extreme care should still be taken to prevent deep scratches or gouges.
- **Drawer Glides:** Periodically check the metal drawer glides for any debris or obstructions that might hinder smooth operation. Clean as necessary.
- **Stability:** Regularly inspect all fasteners and connections to ensure they remain tight. Retighten if necessary to maintain the dresser's stability.

Troubleshooting

Problem	Possible Cause	Solution
Drawers do not slide smoothly.	Debris in glides, misaligned glides, or loose screws.	Clean glides, check alignment, and tighten all screws on the glides and drawer boxes.
Dresser feels wobbly or unstable.	Loose fasteners or uneven floor.	Ensure all assembly fasteners are tight. If on an uneven floor, use shims under the base. Ensure the unit is properly anchored to the wall.
