Primo Portable Manual Water Dispenser User Manual

Model: 851199001794

INTRODUCTION

Thank you for choosing the Primo Portable Manual Water Dispenser. This manual provides essential information for the safe and efficient operation of your new water dispenser. Please read it thoroughly before use and retain it for future reference.

This manual water dispenser is designed to provide refreshing room temperature water without the need for electricity, making it ideal for various settings including home, office, camping, or emergencies. Its portable design includes a carry handle for easy transport and supports the full weight of the water bottle.

IMPORTANT SAFETY INFORMATION

- Always ensure the dispenser is securely attached to the water bottle before lifting or moving.
- Do not attempt to dispense hot liquids with this unit. It is designed for room temperature water only.
- Keep out of reach of small children to prevent accidental spills or misuse.
- Inspect the dispenser regularly for any signs of damage or wear. Do not use if damaged.
- Use only with compatible Primo 3 and 5-gallon press top bottles (55mm) or screw cap bottles (48mm) using the included adapter.

PRODUCT COMPONENTS

Familiarize yourself with the parts of your Primo Portable Manual Water Dispenser:

- **Pump Head:** The main pumping mechanism.
- **Dispensing Spout:** Where water exits. Includes a convenient cap.
- **Carry Handle:** Integrated into the pump head for easy transport.
- **Bottle Collar/Locking Ring:** Secures the dispenser to the water bottle.
- **Extension Tubes:** Internal tubes that reach the bottom of the water bottle.
- **48mm Adapter:** For use with Primo 3 & 5-gallon screw cap bottles.

SETUP INSTRUCTIONS

Setting up your Primo Portable Manual Water Dispenser is quick and easy:

- 1. Unpack Components:** Carefully remove all parts from the packaging.
- 2. Assemble Extension Tubes:** Connect the extension tubes together to form a single long tube. Ensure they are firmly connected.
- 3. Insert Tube into Pump Head:** Insert the assembled extension tube into the bottom opening of the pump head.
- 4. Prepare Water Bottle:** Remove the cap from your Primo 3 or 5-gallon water bottle.
 - For 55mm press top bottles, no adapter is needed.
 - For 48mm screw cap bottles, attach the provided 48mm adapter to the neck of the water bottle before attaching the dispenser.
- 5. Attach Dispenser to Bottle:** Place the pump head with the extension tube into the opening of the water bottle. Twist the bottle collar/locking ring clockwise until the dispenser is securely fastened to the bottle.
- 6. Position Spout:** Ensure the dispensing spout is facing a convenient direction for use.

OPERATING INSTRUCTIONS

To dispense water:

1. **Place Container:** Position your glass, cup, or container directly under the dispensing spout.
2. **Pump Handle:** Press down firmly and repeatedly on the pump head. Each pump will draw water up through the extension tube and out of the spout.
3. **Stop Dispensing:** Release the pump head when you have dispensed the desired amount of water. The convenient spout cap can be used to prevent dripping when not in use.

CARE AND MAINTENANCE

Regular cleaning will ensure the longevity and hygiene of your dispenser:

- **Cleaning the Exterior:** Wipe the exterior of the pump head and spout with a damp cloth and mild soap. Rinse thoroughly with clean water and dry.
- **Cleaning Internal Tubes:** Periodically, disassemble the extension tubes and rinse them with warm, soapy water. Use a bottle brush if necessary to remove any residue. Rinse thoroughly.
- **Spout Cap:** Ensure the spout cap is clean and free of debris to maintain a proper seal.
- **Storage:** When not in use for extended periods, clean and dry all components thoroughly before storing in a cool, dry place.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No water dispenses or flow is weak.	<ul style="list-style-type: none">Extension tube not reaching water.Air leak at bottle connection.Pump mechanism clogged or damaged.	<ul style="list-style-type: none">Ensure extension tubes are fully assembled and reach the bottom of the bottle.Tighten the bottle collar/locking ring. Check for proper adapter use if applicable.Disassemble and clean the pump and tubes. If damaged, replacement may be necessary.
Water leaks from connection point.	<ul style="list-style-type: none">Dispenser not securely attached.Incorrect adapter used or missing.Seal damaged.	<ul style="list-style-type: none">Ensure the bottle collar is tightened completely.Verify you are using the correct adapter for your bottle type (55mm press top or 48mm screw cap).Inspect rubber seals for cracks or damage.
