

GeneralAire 7002

GeneralAire 990-13 Humidifier Water Filter Instruction Manual

Model: GFI #7002

1. PRODUCT OVERVIEW

The GeneralAire 990-13 Humidifier Water Filter, also known as GFI #7002, is a crucial component designed to maintain optimal humidity levels in your home. This vapor pad is constructed with an expanded aluminum base coated with a hydrophilic material that efficiently absorbs water. As warm air from your furnace passes through the vapor pad, the water contained in the coating evaporates, adding humidity to your indoor environment.

This filter is compatible with a range of GeneralAire humidifier models, including 709, 990, 1040, 1137, 1042LH, and SL16. It also fits Trion G100, G300; Herrmidifier 100; and Protech 84-25054, 84-25054-05.

BREATHE HEALTHIER™
GeneralAire®

990-13

(GFI #7002)

Legacy Humidifier Vapor Pad®

For 1042 & 1137

- Also fits discontinued models 709, 990, 1040, 1042, & SL16
- Coated metal pad offers optimal water absorption and humidification
- Replace once per year for maximum performance of your humidifier
- Replacement instructions are located on the reverse side; or by visiting www.GeneralFilters.com and our video library to watch a video demonstration
- Ideal humidity level is between 40-60%

Model 1042LH

Also Known As: Water Panel, Water Filter, Evaporator Pad

For optimal performance, replace your Vapor Pad® at the beginning of each heating season and again mid-season.

Figure 1.1: GeneralAire 990-13 Humidifier Water Filter packaging. The packaging highlights compatibility with models 1042 and 1137, and notes that replacement instructions are on the reverse side. It also mentions the ideal humidity level is between 40-60%.

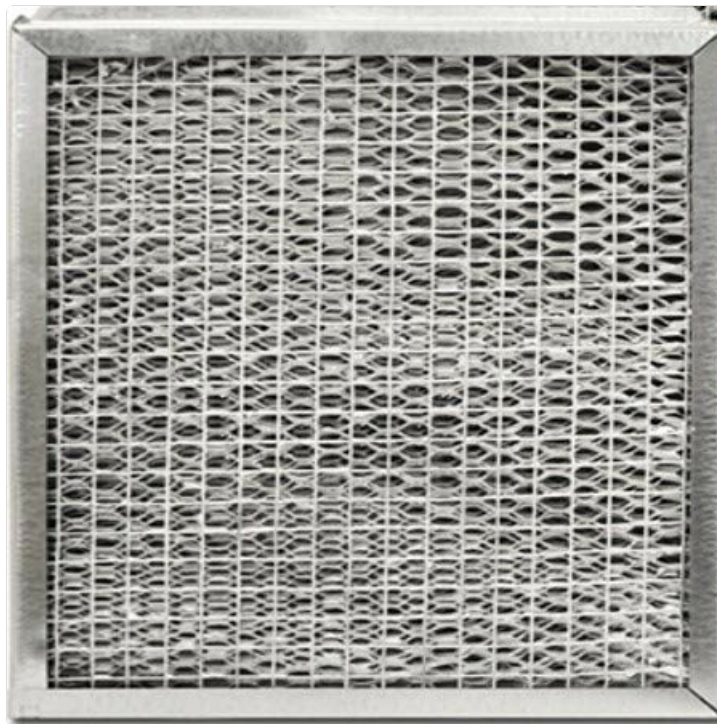

Figure 1.2: Close-up view of the GeneralAire humidifier filter's expanded aluminum base and hydrophilic coating. This material is designed for optimal water absorption and evaporation.

2. SETUP AND INSTALLATION

The GeneralAire 990-13 Humidifier Water Filter is designed for straightforward replacement. For detailed, step-by-step instructions, refer to the reverse side of the product packaging. Generally, installation involves removing the old vapor pad and inserting the new one into the humidifier unit.

It is recommended to replace the vapor pad once per year to ensure maximum humidifier output and efficiency. For optimal performance, consider replacing the vapor pad at the beginning of each heating season and again mid-season, especially in areas with hard water.

3. OPERATING PRINCIPLE

The GeneralAire 990-13 vapor pad functions by facilitating the evaporative humidification process. The hydrophilic coating on the aluminum base absorbs water from the humidifier's reservoir. As your furnace's warm air passes through the saturated pad, the water evaporates into the air stream, increasing the humidity in your home. This process helps maintain a comfortable and healthy indoor environment.

4. MAINTENANCE

Regular replacement of the GeneralAire 990-13 vapor pad is the primary maintenance requirement. Over time, mineral deposits from the water will build up on the pad, which can impede the passage of warm air and reduce the humidifier's effectiveness.

- **Replacement Frequency:** Replace the vapor pad at least once per year. Depending on water hardness and humidifier usage, more frequent replacement may be necessary.
- **Do Not Wash:** It is critical *not* to wash the vapor pad in an attempt to clean it. Washing will remove the specialized hydrophilic coating, rendering the pad ineffective and preventing your humidifier from providing humidity to your home.

5. TROUBLESHOOTING

If your humidifier is not producing sufficient humidity, consider the following:

- **Reduced Humidity Output:** This is often a primary indicator that the vapor pad is saturated with mineral deposits and

needs replacement. A clogged pad prevents proper airflow and water evaporation.

- **Visible Mineral Buildup:** Inspect the vapor pad for visible white or crusty mineral deposits. If present, replace the pad immediately.
- **Incorrect Installation:** Ensure the new vapor pad is installed correctly according to the instructions on the packaging.

6. SPECIFICATIONS

Feature	Detail
Model Number	7002
Dimensions (Approximate)	1.6"D x 9.95"W x 12.35"H
Item Weight	1 Pound
Compatibility	GeneralAire 1137, 1042, 1040 Series, 1099LHS, SL16; Trion G100, G300; Herrmidifier 100; Protech 84-25054, 84-25054-05
Material	Expanded aluminum base with hydrophilic coating
Recommended Replacement	Once per year

7. WARRANTY AND SUPPORT

For specific warranty information regarding your GeneralAire 990-13 Humidifier Water Filter, please refer to the product packaging or contact GeneralAire directly. GENERAL FILTERS INCORPORATED
GeneralAire® Models 1137
 Fan Powered Flow Through Humidifier

Legacy Series Humidifier
 Residential Whole-House (GFI #5137)

Breathe Healthier
 Control Indoor Humidity.

Installing a GeneralAire® Whole House Humidifier can reduce allergy and asthma symptoms, minimize risk of mold, protect valuables (such as furniture, woodwork and musical instruments) and save you money.

How The 1137 Works:
 The 1137 is a fan-powered flow through humidifier that draws air from your furnace through the water-wetted "Vapor Pad" and blows it directly into your home. No ductwork or fan motor is required. The 1137 is designed to work with your furnace's blower motor.

Maintenance
 The 1137 is designed to be easy to maintain. It has a removable "Vapor Pad" that can be replaced every 1-2 years. The 1137 also has a "Vapor Pad" that can be replaced every 1-2 years.

Protect Your Humidifier's Health:
 The 1137 is designed to be easy to maintain. It has a removable "Vapor Pad" that can be replaced every 1-2 years. The 1137 also has a "Vapor Pad" that can be replaced every 1-2 years.

Protect Your Valuables:
 The 1137 is designed to be easy to maintain. It has a removable "Vapor Pad" that can be replaced every 1-2 years. The 1137 also has a "Vapor Pad" that can be replaced every 1-2 years.

Save Money:
 The 1137 is designed to be easy to maintain. It has a removable "Vapor Pad" that can be replaced every 1-2 years. The 1137 also has a "Vapor Pad" that can be replaced every 1-2 years.

Why A Whole-House Unit?
 The 1137 is designed to be easy to maintain. It has a removable "Vapor Pad" that can be replaced every 1-2 years. The 1137 also has a "Vapor Pad" that can be replaced every 1-2 years.

GENERAL FILTERS INCORPORATED **990-13** (GFI #7002)

BREATHE HEALTHIER
GeneralAire®

Legacy Humidifier Vapor Pad®
For 1042 & 1137

- Also fits discontinued models 709, 990, 1040, & SL16
- Coated metal pad offers optimal water absorption and humidification
- Replace once per year for maximum performance of your humidifier
- Replacement instructions are located on the reverse side; or by visiting www.GeneralFilters.com and our video library to watch a video demonstration
- Ideal humidity level is between 40-60%

Model 1042, 1137

Also Known As: Water Panel, Water Filter, Evaporator Pad

For optimal performance, replace your Vapor Pad® at the beginning of each heating season and again mid-season.

Model 1042LH
Legacy Series Humidifier
Residential Whole-House (GFI #5144)

Breathe Healthier

Control Indoor Humidity.

Installing a GeneralAire® Whole House Humidifier can reduce allergy and asthma symptoms, minimize risk of infection, protect valuables (such as furniture, woodwork and musical instruments) and save you money.

How the 1042 Works:

Your furnace sends warm air through a water-wetted Vapor Pad® inside your furnace, where it absorbs additional moisture. Warm, moistened air is then distributed throughout your home to provide healthier indoor air for you and your family.

Model made or go to: www.generalairs.com/model1042

Install a humidifier in your home to:

Protect your family's health:

Low humidity is often blamed for throat and cough, your throat and nasal passages to dry. This leads to increased susceptibility to colds, flu, and other respiratory infections. Dry air can irritate your skin, causing dryness and allergy symptoms. Air that's too dry causes dry skin and chapped lips.

Protect Your Valuables:

Dry air in your home can cause expensive artwork, wood flooring, cabinets, furniture and musical instruments to crack. Dry air increases static electricity, which can cause damage to electronic equipment.

Save money:

Control air air can cause discomfort by causing sweating, glass or windows to steam or fog, or causing air to be too dry, dry as the winter. Turn the unit up and down to 40-60% RH. You will breathe better and save money.

Legacy Series Humidifier
Residential Whole-House (GFI #5144)

Control Indoor Humidity.

Installing a GeneralAire® Whole House Humidifier can reduce allergy and asthma symptoms, minimize risk of infection, protect valuables (such as furniture, woodwork and musical instruments) and save you money.

How the 1042 Works:

Your furnace sends warm air through a water-soaked Vapor Pad[®] inside your humidifier, where it absorbs additional moisture. Newly-moistened air is then distributed throughout your home to provide healthier indoor air for you and your family.

Install a humidifier in your home to:

Protect your family's health:

Low humidity is where viruses can thrive and cause your throat and nasal passages to dry. This leads to nose bleeds, increased risk of infection, colds, flu and other respiratory ailments. Dry air can trigger asthma and allergy symptoms. Air that's too dry causes dry/itchy/cracked skin.

Protect Your Valuables:

Dry air in your home can cause expensive artwork, wood flooring, cabinets, furniture and musical instruments to crack. Dry air increases annoying static shocks that can damage electronics.

Save money: Since dry air can cause woodwork to crack, resulting gaps in windows & doors let cold outside air in. In addition, dry air feels colder. Take it all out with a 10151 M. Turn your thermostat down, and save money.

Manufacturers of Whole House Residential Indoor Air Quality Products. In Business Since 1872.
