SABRE S-1005-PR

SABRE 2-in-1 Stun Gun and Flashlight User Manual

Brand: SABRE

Model: S-1005-PR

INTRODUCTION

This manual provides essential information for the safe and effective use of your SABRE 2-in-1 Stun Gun and Flashlight. This device is designed for personal safety, offering a powerful deterrent and illumination in various situations.

Figure 1: SABRE 2-in-1 Stun Gun and Flashlight (Purple model shown).

The SABRE 2-in-1 Stun Gun and Flashlight is a compact and powerful personal safety device. It delivers a 1.60 μC (Microcoulombs) charge, designed to produce 'intolerable pain' for effective self-protection. Additionally, it features a 120-lumen LED flashlight for illumination in dark environments or emergencies. The device is designed with a comfortable, rubberized grip and includes a belt holster for convenient and discreet carrying.

KEY FEATURES

- **Personal Protection:** Independently tested for reliable protection.
- **Extreme Stopping Power:** Delivers a 1.60 μC charge to maximize self-protection.
- **Integrated Flashlight:** Bright 120-lumen LED flashlight for illumination.
- **Compact and Portable:** Designed for easy carrying and discreet storage.
- **Rechargeable Battery:** Built-in rechargeable battery for multiple uses.
- **Secure Grip:** Rubberized grip ensures a firm hold during use.
- **Belt Holster:** Includes a holster for instant access.

SETUP

Charging the Device

Before first use, fully charge your SABRE 2-in-1 Stun Gun. The device features a built-in rechargeable battery. Use the provided USB charging cord to connect the stun gun to a compatible USB power source.

1. Locate the charging port on the stun gun.
2. Insert the USB charging cord into the port.
3. Connect the other end of the USB cord to a power adapter (not included) or a computer's USB port.
4. Allow the device to charge until the charging indicator light (if present) indicates a full charge. Refer to the indicator light behavior in the specifications section for details.

Attaching the Belt Holster

The included belt holster allows for convenient and quick access to your stun gun.

1. Slide the stun gun into the holster with the flashlight end facing down.
2. Secure the stun gun in the holster using the flap or strap provided.

3. Attach the holster to your belt or waistband for easy access.

OPERATING INSTRUCTIONS

Using the Flashlight

The integrated 120-lumen LED flashlight can be used independently for illumination.

- Locate the flashlight activation button, typically on the side of the device.
- Press the button to turn the flashlight ON.
- Press the button again to turn the flashlight OFF.

Using the Stun Gun Function

The stun gun function is intended for self-defense only. Always ensure you are familiar with its operation before an emergency arises.

Figure 3: Steps for using the stun gun function.

1. **Access the Device:** If using the belt holster, quickly remove the stun gun.
2. **Disengage Safety Switch:** Locate the safety switch, typically a sliding button, and move it to the "ON" or "FIRE" position. This prevents accidental discharge.
3. **Activate Stun Gun:** Press and hold the activation button (often separate from the flashlight button). You will hear a crackling sound and see an arc of electricity between the prongs.
4. **Make Contact:** Firmly press the stun gun's prongs against the attacker's body. Effective areas include large muscle groups. Maintain contact for a few seconds to allow the charge to incapacitate the attacker.
5. **Re-engage Safety:** After use, immediately return the safety switch to the "OFF" or "SAFE" position to prevent accidental discharge.

WARNING: Use of this device is for self-defense only. Check local laws and regulations regarding stun gun ownership and use.

MAINTENANCE

Charging

To ensure optimal performance, regularly charge your stun gun. It is recommended to fully charge the device every 30-60 days, even if not used, to maintain battery health.

Cleaning and Storage

- Wipe the device with a soft, dry cloth to remove dust and debris. Do not use abrasive cleaners or immerse the device in water.
- Store the stun gun in a cool, dry place, away from direct sunlight and extreme temperatures.
- Keep out of reach of children and unauthorized individuals.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Stun gun does not activate (no sound/arc)	Safety switch is engaged; battery is low or depleted; internal malfunction.	Ensure safety switch is in the "ON" position. Fully charge the device. If the issue persists after charging, contact customer support.
Flashlight does not turn on	Battery is low or depleted; LED malfunction.	Fully charge the device. If the issue persists, contact customer support.
Device not holding a charge	Battery degradation; faulty charging cable/adapter.	Ensure you are using the provided USB charging cord and a functional power adapter. If the problem continues, the battery may need replacement or the device may require service. Contact customer support.

Material: Plastic

Color: Purple

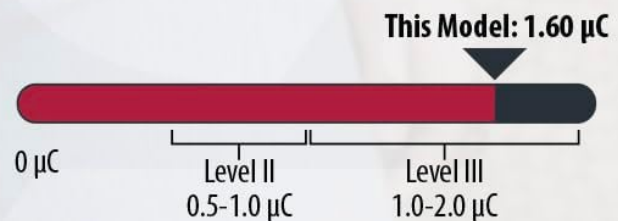

UPC: 023063808055

THE TRUTH ABOUT STUN GUNS

Extreme Stopping Power

From the National Institute of Justice: charge (measured in microCoulombs/ μC) indicates stun gun strength / stopping power.

$\geq 0.5 \mu\text{C}$	Subjects report feeling pain
$\geq 1.0 \mu\text{C}$	Subjects report feeling intolerable pain

NOTICE: Voltage does NOT indicate stun gun strength / stopping power. More at sabrered.com/shocking.

Figure 4: Understanding Stun Gun Power (Microcoulombs).

The strength of a stun gun is measured in Microcoulombs (μC), indicating its ability to induce pain and incapacitate. This model delivers 1.60 μC , categorized as Level III, which is designed to cause intolerable pain.

WARRANTY INFORMATION

This SABRE Stun Gun comes with a **2-year limited warranty**. This warranty covers defects in materials and workmanship under normal use. For specific terms and conditions, or to register your product, please refer to the information provided with your product packaging or visit the official SABRE website.

All SABRE Stun Guns are independently tested by Rassetica Testing Limited to ensure Microcoulombs (uC) emission for reliable protection you can count on when faced with danger.
