4. **Clean Motor Body:** The motor body should be wiped clean with a damp cloth. Do NOT immerse the motor body in water or any other liquid.
5. **Storage:** Store the hand blender and its accessories in a dry place. The blending arm can be detached for compact storage.

TROUBLESHOOTING

- **Blender Not Turning On:** Ensure the unit is securely plugged into a working electrical outlet. Confirm that the

blending arm is correctly attached to the motor body. The blender operates only when the speed button is continuously pressed.

- **Blending Arm Detaches During Use:** Ensure the blending arm is twisted firmly into place until it clicks. Improper attachment can cause it to loosen during operation.
- **Ineffective Blending:** Ensure the ingredients are adequately covered by liquid for optimal blending. For thicker mixtures, use the high-speed setting and move the blending arm up and down to circulate ingredients.
