Sonic Alert Super Shaker 12V Bed Vibrator Instruction Manual

Model: 1126-SA-SS12VW

Brand: Sonic Alert

INTRODUCTION

The Sonic Alert Super Shaker 12V Bed Vibrator is designed to provide a powerful vibrating alert to assist in waking individuals, particularly those who are heavy sleepers or have hearing impairments. This unit functions by connecting to a compatible Sonic Boom Alarm Clock, delivering strong vibrations directly to your bed or pillow.

SAFETY INFORMATION

- Ensure the vibrator is only connected to the designated vibrator outlet on a compatible Sonic Boom Alarm Clock.
- Do not attempt to open or modify the device.
- Keep the device away from water or excessive moisture. While listed as waterproof, direct submersion or exposure to large amounts of liquid should be avoided to prevent damage to the electrical connection.
- Keep out of reach of children and pets.

PACKAGE CONTENTS

- Sonic Alert Super Shaker 12V Bed Vibrator (Model 1126-SA-SS12VW)

SETUP

1. **Identify the Vibrator Outlet:** Locate the dedicated vibrator outlet on the back of your Sonic Boom Alarm Clock. This is typically labeled.

- 2. Connect the Super Shaker:** Insert the plug of the Super Shaker 12V Bed Vibrator into the vibrator outlet on your Sonic Boom Alarm Clock. Ensure the connection is secure.
- 3. Placement:** For optimal effectiveness, place the Super Shaker unit under your pillow or between your mattress and box springs. Experiment with placement to find what works best for your comfort and to ensure effective vibration transfer. Avoid placing it directly on hard surfaces that might amplify noise rather than vibration.

OPERATING INSTRUCTIONS

The Super Shaker 12V Bed Vibrator operates in conjunction with your Sonic Boom Alarm Clock. Once connected, the vibrator will activate simultaneously with the alarm function of your clock. Refer to your Sonic Boom Alarm Clock's instruction manual for details on setting alarms and adjusting alarm modes (e.g., vibration only, alarm sound only, or both).

The powerful vibrations are designed to effectively wake even heavy sleepers without disturbing others in the vicinity, making it an ideal solution for shared living spaces or individuals with hearing loss.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Vibrator does not activate.	Not properly connected to the alarm clock.	Ensure the vibrator's plug is fully inserted into the designated vibrator outlet on the Sonic Boom Alarm Clock.
Vibrator is weak or inconsistent.	Loose connection or unit malfunction.	Check the connection. If the issue persists, the unit may require replacement. Wires can wear out over time.
Vibrator makes excessive noise.	Improper placement.	Adjust the placement of the vibrator. Ensure it is under a pillow or between soft bedding, not directly on a hard surface that could resonate.

MAINTENANCE

- Cleaning:** Wipe the exterior of the vibrator with a soft, dry cloth. Do not use liquid cleaners or

abrasive materials.

- **Storage:** When not in use, store the vibrator in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Cord Care:** Avoid bending or twisting the power cord excessively to prevent internal wire damage.
