Logitech B525

Logitech B525 HD Webcam User Manual

Model: B525 (960-000841)

PRODUCT OVERVIEW

The Logitech B525 HD Webcam is designed for clear and reliable video communication. Its compact, fold-and-go design makes it highly portable, while the 360-degree swivel feature allows for flexible positioning. It delivers HD 720p video quality with autofocus and includes a built-in stereo microphone for excellent audio.

Key Features

- **HD 720p Video Calling:** Experience true-to-life video calls at up to 30 frames per second.
- **Autofocus:** Ensures sharp and clear images during your calls.
- **Built-in Stereo Microphone:** Provides clear audio without the need for an external mic.
- **360-Degree Swivel Design:** Allows for flexible camera positioning and privacy.
- **Fold-and-Go Design:** Enables easy packing and storage, enhancing portability.
- **Automatic Light Correction:** Intelligently adjusts to dim or poorly backlit settings for optimal image quality.
- **Broad Compatibility:** Works with virtually any business video-calling client, optimized for Microsoft Lync and certified for Skype.

SETUP GUIDE

System Requirements

- Windows 7 or higher
- macOS X 10.7 or higher
- One USB 2.0 port
- Certified for Skype and Skype for Business

Installation

The Logitech B525 HD Webcam features a simple plug-and-play setup. Connect the webcam's USB cable to an available USB 2.0 port on your computer. The operating system will automatically detect the device and install the necessary drivers. No additional software installation is typically required for basic functionality.

Mounting the Webcam

The webcam is designed with a versatile fold-and-go stand that allows for easy placement on top of your

monitor or laptop screen. Adjust the stand to securely grip the top edge of your display. The 360-degree swivel design enables you to position the camera at any desired angle, including moving it away for privacy.

OPERATING INSTRUCTIONS

Making Video Calls

Once connected, the Logitech B525 HD Webcam is ready for use with most video conferencing applications such as Skype, Microsoft Lync, Zoom, and others. Select the Logitech B525 as your preferred camera and microphone within your application's settings.

Image and Audio Quality

The webcam provides HD 720p video at up to 30 frames per second, ensuring clear and true-to-life video calls. It features autofocus for sharp images and a built-in stereo microphone for clear audio. The webcam intelligently adjusts to dim or poorly backlit settings to produce the best possible image.

MAINTENANCE

Cleaning

To clean the webcam lens, use a soft, lint-free cloth. Avoid using abrasive cleaners or solvents that could damage the lens or casing. For general cleaning of the body, a slightly damp cloth is sufficient.

Storage

Utilize the fold-and-go design to compactly store the webcam when not in use or when traveling. This protects the lens and integrated stand from damage.

TROUBLESHOOTING

Common Issues and Solutions

Webcam Not Recognized

Ensure the USB cable is securely plugged into a functioning USB 2.0 port. Try a different USB port. Restart your computer. Check your operating system's device manager to see if the webcam is listed and if there are any driver issues. Sometimes unplugging and replugging the device can resolve recognition issues.

Blurry or Pixelated Image

Verify that the lens is clean and free from dust or smudges. The webcam features autofocus; ensure there are no obstructions in front of the lens that might interfere with its operation. While the B525 has autofocus, some users report occasional re-autofocusing. Ensure adequate lighting in your environment for optimal image quality, as the webcam adjusts to low light conditions.

No Audio or Poor Audio Quality

Check your video conferencing application's settings to ensure the Logitech B525's built-in microphone is selected as the input device. Verify your computer's sound settings to ensure the microphone is enabled and not muted. If using external speakers, ensure they are properly connected and configured.

SPECIFICATIONS

| Feature	Detail
