4. OPERATING INSTRUCTIONS

Powering On/Off:

Plug the appliance into a suitable power outlet. The mixer is turned on by selecting a speed setting and turned off by setting the speed selector to '0'.

Speed Control:

The hand mixer features 5 speed settings. Rotate the speed selector to choose the appropriate speed for your task:

- **Speed 1-2:** For gentle mixing, folding, or starting to combine ingredients.
- **Speed 3-4:** For general mixing, beating batters, or mashing.
- **Speed 5:** For whipping cream, egg whites, or heavy-duty mixing.

Using the Turbo Function:

Press and hold the 'Turbo' button for a short burst of maximum power, regardless of the selected speed setting. Release the button to return to the previously selected speed or to stop if the speed selector is at '0'.

Mixing and Kneading Tips:

- Always start at a low speed to prevent splashing, then gradually increase to the desired speed.
- Move the mixer slowly through the ingredients to ensure even mixing.
- For heavy doughs, use the kneading hooks and avoid overworking the dough.
- Do not operate the mixer continuously for more than 5 minutes. Allow it to cool down for a few minutes before resuming use.

1. Ensure the hand mixer is unplugged from the power outlet.
