Omron HBF-214 Body Composition Meter Instruction Manual

Model: HBF-214

1. INTRODUCTION

This manual provides essential instructions for the safe and effective use of your Omron HBF-214 Body Composition Meter. Please read this manual thoroughly before using the device and retain it for future reference. The Omron HBF-214 is designed to measure body weight and estimate various body composition metrics.

2. SETUP

2.1 Unpacking

Carefully remove the body composition meter from its packaging. Ensure all components are present and undamaged. Dispose of packaging materials responsibly.

2.2 Battery Installation

The Omron HBF-214 requires four (4) AAA batteries. Locate the battery compartment on the underside of the device. Insert the batteries according to the polarity indicators (+/-). Close the battery compartment securely.

2.3 Device Placement

For accurate measurements, place the body composition meter on a hard, flat, and stable surface. Avoid placing the device on soft surfaces such as carpets, rugs, or tatami mats, as this can affect measurement accuracy.

2.4 Initial User Registration

Upon first use or after battery replacement, you will need to register user profiles. The device supports up to four user profiles. Follow the on-screen prompts to enter personal data such as age, height, and gender. Please note that the device display may be in Japanese. Refer to the operating instructions in Section 3 for guidance on navigating the interface.
