4. CARE & MAINTENANCE

Proper care will extend the life of your Wet Brush:

- **Cleaning:** Regularly remove loose hair from the bristles. For a deeper clean, wash the brush with mild soap and water. Allow it to air dry completely with the bristles facing down to prevent water from accumulating in the cushion.
- **Storage:** Store your brush in a clean, dry place. Avoid leaving it in direct sunlight or extreme temperatures.
- **Heat Warning:** Do not use the Wet Brush with a blow-dryer as heat may damage the IntelliFlex bristles. For blow-drying, consider using a Wet Brush Speed Dry model.

5. TROUBLESHOOTING

- **Bristles Bending/Damaged:** If bristles become bent or damaged, it may affect detangling performance. Ensure the brush is not exposed to excessive heat or pressure. Consider replacing the brush if damage is significant.
- **Ineffective Detangling:** If the brush is not detangling effectively, ensure your hair is adequately

conditioned (if wet) and that you are brushing from the ends upwards. Excessive product buildup on the bristles can also reduce effectiveness; clean the brush thoroughly.
