Duravit Starck 3 Cistern User Manual

Model: 0920400004

1. PRODUCT OVERVIEW

The Duravit Starck 3 Cistern, model 0920400004, is a white porcelain toilet tank designed for use with compatible toilet systems. It features a single flush mechanism operated by a side lever and is equipped with a 3-inch flapper valve. This cistern is intended for floor-mounted installation and includes a bottom left supply connection.

Figure 1: Front view of the Duravit Starck 3 Cistern.

Key Features:

- Single flush mechanism for efficient water usage.
- Convenient side lever for flush activation.
- Equipped with a durable 3-inch flapper valve.
- Designed for bottom left water supply connection.

2. SETUP AND INSTALLATION

This section provides general guidelines for the installation of the Duravit Starck 3 Cistern. Professional installation by a qualified plumber is recommended to ensure proper function and compliance with local plumbing codes.

Pre-Installation Checklist:

- Ensure all necessary plumbing connections are available, specifically a bottom left water supply.

- Verify compatibility with your existing or new toilet bowl.
- Inspect the cistern for any visible damage prior to installation.
- Gather required tools (e.g., wrenches, sealant, level).

Installation Steps (General):

1. **Prepare the Area:** Turn off the main water supply and drain any remaining water from the existing toilet system if replacing.
2. **Position the Cistern:** Carefully place the cistern onto the toilet bowl, ensuring the gasket aligns correctly with the flush valve opening.
3. **Secure the Cistern:** Use the provided bolts and washers to securely fasten the cistern to the toilet bowl. Do not overtighten to avoid cracking the porcelain.
4. **Connect Water Supply:** Attach the water supply line to the bottom left inlet of the cistern. Use appropriate sealant or plumber's tape to ensure a watertight connection.
5. **Install Internal Components:** Ensure the fill valve and flapper valve are correctly seated and connected according to the manufacturer's instructions.
6. **Test for Leaks:** Slowly turn on the water supply and allow the cistern to fill. Check all connections for leaks. Flush the toilet several times to verify proper operation and check for any leaks during flushing.

Figure 2: Duravit Starck 3 Cistern installed as part of a complete toilet unit.

3. OPERATING INSTRUCTIONS

The Duravit Starck 3 Cistern operates with a simple single flush mechanism.

Flushing the Toilet:

- To activate the flush, gently press down on the side lever located on the cistern.
- Hold the lever down briefly until the water begins to drain from the bowl.
- Release the lever, and the cistern will automatically refill to its designated water level.

Important: Do not force the lever. If the flush mechanism feels stiff or does not operate correctly, refer to the Troubleshooting section.

4. MAINTENANCE

Regular maintenance ensures the longevity and efficient operation of your Duravit Starck 3 Cistern.

Cleaning:

- Clean the exterior of the cistern with a soft cloth and mild, non-abrasive cleaning agents.
- Avoid harsh chemicals, abrasive cleaners, or scouring pads, as these can damage the porcelain finish.
- For internal cleaning, periodically remove the cistern lid and inspect for mineral buildup or debris. Use a toilet brush or non-abrasive sponge with a mild cleaner if necessary.

Component Inspection:

- **Flapper Valve:** Periodically check the 3-inch flapper valve for wear, cracks, or stiffness. A worn flapper can cause slow leaks.
- **Fill Valve:** Ensure the fill valve is operating correctly, filling the tank to the appropriate water level and shutting off completely.
- **Water Supply Line:** Inspect the water supply line and connections for any signs of leaks or corrosion.

Note: If replacing internal components, use genuine Duravit parts or compatible replacements to ensure proper function.

5. TROUBLESHOOTING

This section addresses common issues you might encounter with your Duravit Starck 3 Cistern.

Problem	Possible Cause	Solution
Cistern leaks slowly or continuously runs.	◦ Worn or improperly seated flapper valve. ◦ Fill valve not shutting off completely. ◦ Loose connections at the water supply line or cistern bolts.	◦ Inspect and adjust or replace the 3-inch flapper valve. Ensure it forms a tight seal. ◦ Adjust or replace the fill valve if it's not stopping water flow at the correct level. ◦ Check and gently tighten all connections. Do not overtighten.
Weak or incomplete flush.	◦ Low water level in the cistern. ◦ Obstruction in the flush valve or toilet bowl rim jets. ◦ Flapper valve not opening fully.	◦ Adjust the fill valve to ensure the cistern fills to the correct water line. ◦ Clear any blockages in the flush valve or toilet bowl. ◦ Check the flapper chain for proper length and ensure it's not snagged.
Cistern takes too long to fill.	◦ Partially closed water supply valve. ◦ Clogged fill valve. ◦ Low water pressure.	◦ Ensure the water supply valve is fully open. ◦ Clean or replace the fill valve if it is clogged with sediment. ◦ Consult a plumber if low water pressure is a persistent issue.

If these troubleshooting steps do not resolve the issue, it is recommended to contact a qualified plumber or Duravit customer support.

6. SPECIFICATIONS

Brand	Duravit
Model Number	0920400004
Product Name	Starck 3 Cistern
Color	White
Material	Porcelain
Product Dimensions (D x W x H)	7.13" x 14.63" x 7.13"
Item Weight	13.8 Kilograms (30.4 pounds)
Installation Type	Floor Mounted
Water Supply Connection	Bottom Left
Flush Mechanism	Single Flush with Side Lever
Flapper Valve Size	3 inches

7. WARRANTY AND SUPPORT

For specific warranty information regarding your Duravit Starck 3 Cistern, please refer to the documentation provided at the time of purchase or visit the official Duravit website.

Should you require technical assistance, replacement parts, or have questions not covered in this manual, please contact Duravit customer support through their official channels.
