## 6. MAINTENANCE

---

Proper maintenance will extend the life of your Smoby Metal Baby Swing:

- **Cleaning:** Wipe down plastic and metal surfaces with a damp cloth and mild soap. Rinse thoroughly and dry. Avoid abrasive cleaners.
- **Inspection:** Regularly check all bolts, nuts, and connections to ensure they are tight. Inspect the swing seat, ropes, and frame for any signs of wear, cracks, or damage.
- **UV Protection:** The plastic parts are UV-treated for color retention and durability. However, prolonged exposure to direct sunlight and harsh weather conditions can still cause fading over time.
- **Storage:** If not in use for extended periods, especially during adverse weather, consider storing the swing indoors to protect it from elements.

## 7. TROUBLESHOOTING

---

If you encounter any issues with your Smoby Metal Baby Swing, consider the following:

- **Swing feels unstable:** Ensure all frame connections are securely tightened and the swing is placed on a completely level surface.
- **Squeaking noises:** Check for any friction points. A small amount of silicone-based lubricant can be applied to moving metal parts, avoiding contact with plastic.
- **Parts appear damaged:** Discontinue use immediately. Do not attempt to repair damaged structural components. Contact Smoby customer support for replacement parts or advice.
