- **Non-Stick Cooking Plates:** Ensures easy release of waffles and simplifies cleaning.
- **Non-Skid Rubber Feet:** Provides stability during operation.
- **Illuminated Power Indicator Light:** A Mickey Mouse shaped light that indicates when the unit is powered on and heating.
- **Cool-Touch Handle:** For safe opening and closing of the waffle maker.

SETUP

1. **Unpack:** Carefully remove the waffle maker from its packaging. Retain packaging for storage or disposal.
2. **Initial Cleaning:** Before first use, wipe the cooking plates with a damp cloth or sponge. Dry thoroughly. Do not immerse the appliance in water.
3. **Positioning:** Place the waffle maker on a stable, heat-resistant surface, away from walls and other appliances, ensuring adequate ventilation.
4. **First Use (Seasoning):** For optimal non-stick performance, it is recommended to lightly brush or spray the cooking plates with a small amount of cooking oil or butter before the very first use. Wipe off any excess.

OPERATING INSTRUCTIONS

1. **Preheat:** Close the waffle maker and plug the power cord into a standard 120V AC electrical outlet. The Mickey Mouse power indicator light will illuminate, indicating the unit is heating.
2. **Ready Indicator:** The light will remain on during the preheating cycle. The appliance is ready when the light turns off, indicating it has reached the optimal cooking temperature. This typically takes a few minutes.
3. **Prepare Batter:** While the waffle maker preheats, prepare your favorite waffle batter.
4. **Add Batter:** Once preheated, open the waffle maker. Pour approximately 1/2 to 3/4 cup of batter onto the center of the lower cooking plate. Distribute the batter evenly, ensuring it fills the Mickey Mouse shape. Do not overfill.
5. **Cook Waffle:** Carefully close the lid. The power indicator light will turn on again as the appliance maintains temperature. Cook for approximately 3-5 minutes, or until the waffle is golden brown and steam is no longer escaping from the sides. Cooking time may vary based on batter type and desired crispness.
6. **Remove Waffle:** Once cooked, open the lid and carefully remove the waffle using a heat-resistant

plastic or wooden utensil. Do not use metal utensils, as they can damage the non-stick coating.

7. **Repeat:** Close the lid to allow the waffle maker to reheat for the next waffle. The indicator light will cycle on and off.
8. **Finish:** When finished cooking, unplug the waffle maker from the outlet and allow it to cool completely before cleaning or storing.

CARE AND MAINTENANCE

- **Cleaning:** Always unplug the waffle maker and allow it to cool completely before cleaning. Wipe the cooking plates with a damp cloth or sponge. For stubborn residue, a small amount of cooking oil can be applied to soften it before wiping clean. Do not use abrasive cleaners or scouring pads, as these can damage the non-stick coating.
- **Exterior:** Wipe the exterior surfaces with a soft, damp cloth. Do not immerse the appliance in water or any other liquid.
- **Storage:** Once clean and completely dry, store the waffle maker in a cool, dry place. The cord can be wrapped around the base for compact storage.
