Blue Ocean SPA392M

Blue Ocean 52" Aluminum SPA392M Shower Panel Tower System User Manual

Model: SPA392M

Product Overview

The Blue Ocean 52" Aluminum SPA392M Shower Panel Tower System is designed to provide a luxurious and revitalizing shower experience. Crafted from premium aluminum alloy, this system integrates multiple functions including a rainfall shower head, adjustable massage jets, and a multi-functional handheld shower, all controlled independently for optimal water pressure. Its dimensions are approximately 52"H x 10"W x 3.5"D (132 x 26 x 9cm).

Safety Information

Please read all instructions carefully before installation and use. Failure to follow these instructions may result in property damage, personal injury, or death. Retain this manual for future reference.

- Ensure all plumbing connections are secure and watertight to prevent leaks.
- Verify water temperature before stepping into the shower to avoid scalding.
- Do not use abrasive cleaners or harsh chemicals on the panel surface, as this may damage the finish.
- Professional installation is recommended to ensure proper function and to maintain warranty status.

Package Contents

Verify that all components are present before beginning installation:

- 1 x Blue Ocean SPA392M Shower Panel Unit
- 1 x Rainfall Shower Head
- 1 x Multi-functional Handheld Shower with Hose
- Mounting Brackets and Hardware
- Installation Manual

Setup and Installation

This shower panel is designed for wall-mount installation. Due to the nature of plumbing and potential wall modifications, professional installation is highly recommended.

1. **Preparation:** Turn off the main water supply. Ensure the installation area is clean and free of debris.
2. **Mounting:** Secure the mounting brackets to the wall using appropriate hardware. Ensure the brackets are level and spaced correctly according to the panel's dimensions.
3. **Plumbing Connections:** Connect the hot and cold water lines to the corresponding inlets on the back of the shower panel. Ensure all connections are tightly sealed to prevent leaks.
4. **Panel Mounting:** Carefully hang the shower panel onto the secured wall brackets.
5. **Handheld Shower Installation:** Connect the handheld shower hose to its designated outlet on the panel.
6. **Battery Installation (for LED Display):** The LED temperature display requires batteries (typically AA, not included). Access the battery compartment, usually located on the back of the panel, and insert the batteries.
7. **Final Check:** Turn on the water supply and check for any leaks. Test all functions of the shower panel.

Operating Instructions

The Blue Ocean SPA392M Shower Panel offers multiple water outlets and controls for a customized shower experience.

- **Temperature Control:** Use the main handle to adjust the water temperature. The integrated LED display will show the water temperature in Celsius.
- **Function Selector:** Rotate the selector knob to switch between the different water outlets:
  - **Rainfall Shower Head:** Provides a wide, gentle rain-like spray from above. This head is adjustable for angle.
  - **Massage Jets:** Eight adjustable body jets deliver a powerful water massage. These can be set to a "jet" or "mist" setting.
  - **Handheld Shower:** A flexible handheld shower for targeted rinsing. It offers different spray patterns.
  - **Bottom Spout:** A lower spout for filling buckets or for foot rinsing.

  Note: All functions work independently to maintain proper water pressure.
- **LED Temperature Display:** The digital display shows the current water temperature. A button below the screen may allow for cycling through display modes or settings, though the primary temperature unit is Celsius.

Maintenance

Regular cleaning and maintenance will ensure the longevity and optimal performance of your shower panel.

- **Cleaning:** Wipe down the panel surface after each use, especially in areas with hard water, to prevent mineral deposits and maintain its polished finish. Use a soft cloth and mild, non-abrasive cleaning solutions.
- **Jet Maintenance:** Periodically check the massage jets and rainfall shower head for any mineral buildup that might affect water flow. Clean nozzles as needed.
- **Hose Inspection:** Inspect the handheld shower hose for any signs of wear or damage. Replace if necessary.

Troubleshooting

Problem	Possible Cause	Solution
Low Water Pressure	Mineral buildup in jets/shower head; house plumbing issues; water flow restrictor.	Clean jets and shower head. Consult a plumber for house plumbing issues. Check for and remove any water flow restrictors if desired (may affect water consumption).
LED Display Not Working	Dead batteries; loose battery connection.	Replace batteries (AA). Ensure batteries are inserted correctly.
Shower Head/Pipe is Loose	Mounting nut behind the panel is loose.	This may require removing the panel to access and tighten the nut. Professional assistance is recommended.
Temperature Display in Celsius Only	Default setting; no Fahrenheit conversion option.	The unit's display is primarily in Celsius. Familiarize yourself with Celsius temperature ranges for showering.

Specifications

Feature	Detail
Brand	Blue Ocean
Model Number	SPA392M
Color	Silver
Material	Aluminum (Panel), Brass (Handle)
Finish Type	Polished
Number of Handles	1
Mounting Type	Wall Mount
Included Components	Hose
Maximum Pressure	72 Pound per Square Inch
Item Weight	30.9 pounds
