JVC HARX500

JVC HARX500 Full-Size Headphones User Manual

1. Introduction

The JVC HARX500 are full-size headphones designed for an immersive audio experience. They incorporate an Ear Direct Structure with an inclined driver unit, ensuring sound is transmitted effectively to the ear drums. The Twist Action Structure enhances comfort during extended listening sessions. These headphones feature a large 40mm high-quality neodymium magnet driver for clear audio reproduction and a comfortable cushioned headband.

Key Features:

- 40mm Neodymium Driver: Delivers powerful and clear sound.
- Ear-Direct Structure: Optimizes sound transmission to the ear.
- Twist-Action Structure: Provides a comfortable and adaptable fit.
- Cushioned Headband: Ensures comfort during prolonged use.
- Wired Connectivity: Reliable audio connection via a 3.5mm jack.

2. Setup

Follow these steps to set up your JVC HARX500 headphones for first use:

1. **Unpacking:** Carefully remove the headphones and any included accessories from the packaging. Ensure all components are present.
2. **Connecting to Audio Source:**
   - Locate the 3.5mm audio jack on your headphones' cable.
   - Insert the 3.5mm jack into the corresponding audio output port on your device (e.g., smartphone, computer, audio receiver).
   - If your audio source requires a larger 6.3mm (1/4 inch) jack, attach the included adapter to the 3.5mm jack before connecting.
3. **Adjusting for Comfort:**
   - Gently extend or retract the headband slides to fit your head comfortably. The earcups should fully cover your ears without excessive pressure.
   - The Twist Action Structure allows the earcups to pivot slightly, conforming to the shape of your head for an optimal fit.

3. Operating Instructions

Once connected and adjusted, your JVC HARX500 headphones are ready for use:

- **Playing Audio:** Start playback on your connected audio device.
- **Volume Control:** Adjust the volume directly from your audio source. The headphones themselves do not feature integrated volume controls.
- **Wearing:** Ensure the earcups are positioned correctly over your ears for the best sound isolation and audio quality. The cushioned headband and earcups are designed for extended listening comfort.
- **Disconnecting:** When finished, gently pull the audio jack from your device. Avoid pulling the cable itself to prevent damage.

4. Maintenance

Proper care will extend the life and performance of your headphones:

- **Cleaning:**
  - Use a soft, dry cloth to wipe the exterior surfaces of the headphones.
  - For earcups, gently wipe with a slightly damp cloth if necessary, then dry immediately. Avoid excessive moisture.
  - Do not use harsh chemicals, solvents, or abrasive cleaners.
- **Storage:**
  - Store the headphones in a clean, dry place away from extreme temperatures and direct sunlight.
  - Avoid tangling the cable. Consider coiling it loosely for storage.
- **Cable Care:** Avoid sharply bending or twisting the cable, especially near the connectors, to prevent internal wire damage.

5. Troubleshooting

If you encounter issues with your JVC HARX500 headphones, refer to the following common solutions:

- **No Sound:**
  - Ensure the 3.5mm audio jack is fully inserted into both the headphones and the audio source.
  - Check the volume level on your audio device; it might be muted or set too low.
  - Test the headphones with a different audio source to rule out a device-specific issue.
  - If using the 6.3mm adapter, ensure it is securely attached.
- **Distorted or Poor Sound Quality:**
  - Verify that the audio jack is clean and free of debris.
  - Try adjusting the volume on your audio source; excessively high volume can cause distortion.
  - Ensure the earcups are properly seated over your ears for optimal sound.
  - Test with another audio source or audio file to determine if the issue is with the source material.
- **Headphones are Uncomfortable:**
  - Re-adjust the headband length to ensure a proper fit.
  - Ensure the earcups are not pressing too hard on your ears. The Twist Action Structure allows for some flexibility in positioning.

6. Specifications

Feature	Detail
Model Number	HARX500
Driver Unit	40mm Neodymium
Connectivity Technology	Wired
Headphones Jack	3.5 mm Jack (includes adapter for 6.3mm)
Earpiece Shape	Over Ear
Form Factor	Over Ear
