SETUP INSTRUCTIONS

System Requirements

- Operating System: Windows (XP/Vista/7/8/10/11) or Mac OS (X 10.6 or later)
- Available USB 2.0 port(s)
- Minimum 1GB RAM (recommended)
- Minimum 10GB free hard disk space for software installation and temporary files

Connecting the Drive

1. **Prepare the Drive:** Place the ASUS SDRW-08D2S-U LITE on a stable, flat surface. Ensure adequate ventilation around the device.
2. **Connect USB Cable:** The drive uses a USB Y-cable for both data transfer and power. Connect the smaller end of the USB Y-cable to the USB port on the back of the ASUS SDRW-08D2S-U LITE.
3. **Connect to Computer:** Connect both USB plugs of the Y-cable to available USB 2.0 ports on your computer. It is recommended to use both plugs to ensure sufficient power supply, especially for older or less powerful USB ports.

OPERATING INSTRUCTIONS

Inserting and Ejecting a Disc

1. **Open Disc Tray:** Press the eject button located on the front or side of the drive. The disc tray will partially open. Gently pull the tray out completely.
2. **Insert Disc:** Carefully place the disc (CD or DVD) onto the tray with the label side facing up. Ensure the disc is seated correctly on the center spindle.
3. **Close Disc Tray:** Gently push the disc tray back into the drive until it clicks shut. Do not force the tray.
4. **Eject Disc:** To eject a disc, press the eject button on the drive or use the eject function within your operating system (e.g., right-click the drive icon and select "Eject").

Reading Discs

Once a disc is inserted and the tray is closed, your computer's operating system should recognize the disc. For data discs, the contents will typically appear in File Explorer (Windows) or Finder (Mac). For media discs (audio CDs, video DVDs), your default media player may automatically launch or prompt you to choose an action.

Writing/Burning Discs (Drag and Burn)

The ASUS SDRW-08D2S-U LITE supports disc burning functionality, often simplified by the "Drag and Burn" feature (requires included software or compatible third-party software).

1. **Install Software:** If not already installed, install the disc burning software provided with your drive or a compatible third-party application.
2. **Prepare Files:** Gather the files or folders you wish to burn to the disc.
3. **Initiate Burn Process:** Open the burning software. For "Drag and Burn," you typically drag the desired files directly onto a designated area or icon representing the burner.
4. **Start Burning:** Follow the on-screen prompts to configure burning options (e.g., disc type, speed) and start the burning process.

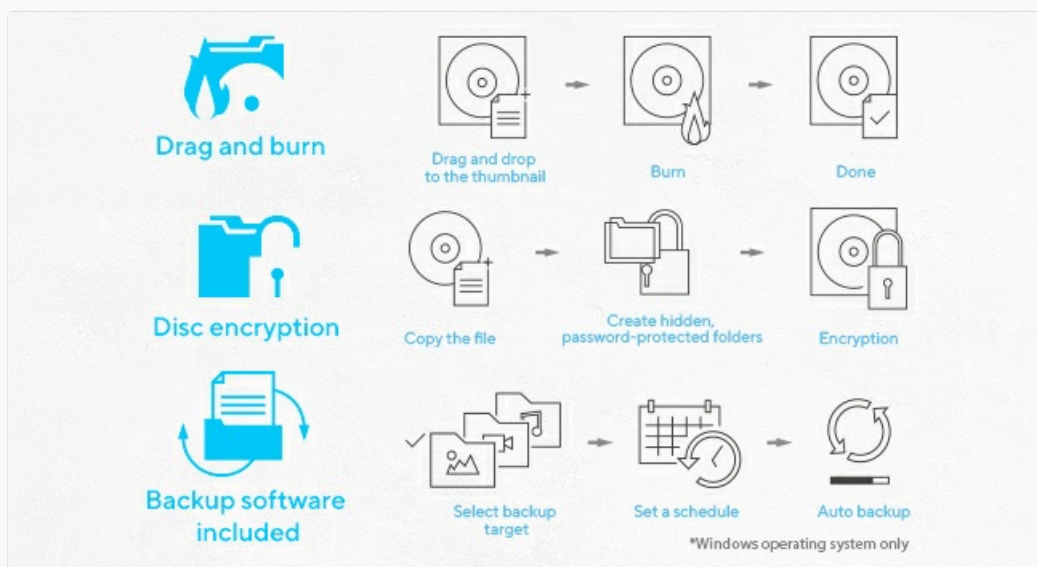

Image: A visual representation of the Drag and Burn process, Disc Encryption steps, and the auto-backup feature of the included software (Windows operating system only).

Disc Encryption

The drive supports Disc Encryption for enhanced data security. This feature allows you to password-protect your discs and create hidden files. Refer to the included software's documentation for detailed instructions on utilizing this feature.

MAINTENANCE

- **Cleaning the Exterior:** Use a soft, dry cloth to wipe the exterior of the drive. Avoid using liquid cleaners or abrasive materials.
- **Disc Care:** Always handle discs by their edges. Store discs in cases to prevent scratches and dust accumulation.
- **Lens Cleaning:** Do not attempt to clean the internal optical lens yourself. If disc reading/writing issues persist, consider using a specialized CD/DVD lens cleaning disc.
- **Storage:** When not in use, store the drive in a cool, dry place away from direct sunlight and extreme temperatures.
- **Safe Ejection:** Always safely eject the drive from your operating system before disconnecting the USB cable to prevent data corruption.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Drive not recognized by computer.	Insufficient power; loose USB connection; driver issue.	Ensure both USB plugs of the Y-cable are connected to active USB ports. Try a different USB port. Restart your computer. Check Device Manager (Windows) or System Information (Mac) for the drive.
Disc not reading/writing correctly.	Dirty or scratched disc; incorrect disc type; software issue.	Clean the disc with a soft, lint-free cloth. Try a different disc. Ensure the disc type (CD-R, DVD-R, etc.) is compatible with the drive and software. Reinstall burning software if necessary.
Disc tray does not open/close smoothly.	Obstruction; mechanical issue.	Check for any physical obstructions. Do not force the tray. If the issue persists, contact support.
Slow burning speed.	Background processes; disc quality; USB 2.0 limitations.	Close unnecessary applications. Use high-quality blank media. Ensure your USB ports are functioning optimally.
