6. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to gently wipe dust from the figure. For stubborn dirt, a slightly damp cloth can be used, but avoid harsh chemicals or abrasive materials.
- **Storage:** Store the figure in a cool, dry place away from direct sunlight and extreme temperatures to prevent discoloration or material degradation. Keep it in its original packaging or a display case to protect it from dust and damage.
- **Joint Care:** If joints become stiff, apply a small amount of silicone shock oil (specifically designed for plastic models) to the joint. Do not use petroleum-based lubricants.

7. TROUBLESHOOTING

- **Difficulty Transforming:** If you encounter resistance during transformation, do not force parts. Re-examine the instructions or consult online transformation guides. Ensure all previous steps are correctly executed and panels are unlocked.
- **Loose Joints:** Over time, some joints may become loose. This is common with articulated figures. For minor looseness, clear nail polish or a specialized joint-tightening fluid can be applied sparingly to the joint, allowed to dry, and then reassembled.
- **Missing or Damaged Parts:** If any parts are missing or damaged upon receipt, contact the retailer or manufacturer's customer support immediately.
