4.2 Powersave Mode

To conserve battery life, the VX1 controller features an automatic powersave mode. If the controller is inactive for approximately 5 minutes, it will automatically power down. To reactivate, simply press the central "PS" button.

4.3 Firmware Updates

The VX1 controller's firmware can be updated to ensure optimal performance and compatibility. Firmware updates require a Windows operating system and Gioteck software. Please visit the official Gioteck website for the latest software and instructions.

5. MAINTENANCE

5.1 Cleaning

To clean your controller, use a soft, dry cloth. For stubborn dirt, a slightly damp cloth with mild soap can be used, but ensure no liquid enters the controller's openings. Do not use harsh chemicals or abrasive cleaners.

5.2 Battery Care

The VX1 controller is powered by an advanced Li-Polymer battery. To maximize battery lifespan:

- Avoid fully discharging the battery frequently.
- Store the controller in a cool, dry place when not in use for extended periods.
- Do not expose the controller to extreme temperatures.

5.3 Storage

When storing the controller, especially for long periods, ensure it is clean and charged to approximately 50%. Keep it away from direct sunlight, dust, and moisture.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Controller does not respond or connect.	Low battery, dongle not inserted, pairing issue, interference.	Charge the controller fully. Ensure the USB dongle is securely inserted into the PS3. Press the PS button to re-attempt pairing. Try a different USB port on the PS3. Reduce distance between controller and dongle.
Input lag or delayed response.	Wireless interference, distance from dongle, low battery.	Ensure controller is within optimal range of the dongle. Charge the controller. Minimize other 2.4GHz wireless devices nearby.
Controller randomly disconnects or pauses game.	Wireless interference, faulty dongle, low battery.	Re-pair the controller. Try a different USB port for the dongle. Ensure controller is charged. Check for firmware updates.

Problem	Possible Cause	Solution
Controller does not charge.	Faulty cable, faulty USB port, battery issue.	Try a different USB charging cable. Try a different USB port on the PS3 or a different USB power source. If the issue persists, contact Gioteck support.
