

Rapoo E1050

Rapoo E1050 2.4G Anti-Splash Wireless Keyboard User Manual

Model: E1050

1. INTRODUCTION

Thank you for choosing the Rapoo E1050 2.4G Anti-Splash Wireless Keyboard. This manual provides detailed instructions on how to set up, operate, and maintain your new keyboard. The Rapoo E1050 is designed for reliable performance and convenience, featuring a stable 2.4GHz wireless connection and a spill-resistant design for enhanced durability.

Image: Top-down view of the Rapoo E1050 wireless keyboard, showcasing its full layout.

Key Features:

- **Reliable 2.4GHz Wireless Connection:** Enjoy a stable connection with up to 10-meter working range.
- **Spill-Resistant Design:** Protects against accidental spills, ensuring durability.
- **Multimedia Fn Keys:** Quick access to media player, homepage, volume adjustment, and more.
- **Plug and Play:** No installation software or drivers required.
- **Long Battery Life:** Designed for power saving and environmental friendliness.

2. SETUP GUIDE

2.1 Package Contents

Before you begin, please ensure all items are present in the package:

- Rapoo E1050 Wireless Keyboard
- USB Nano Receiver

- 1 AA Battery (pre-installed or included separately)

2.2 Battery Installation

The Rapoo E1050 keyboard requires one AA battery for operation. The battery is typically included with the product.

1. Locate the battery compartment on the underside of the keyboard.
2. Open the battery compartment cover.
3. Insert the AA battery, ensuring the positive (+) and negative (-) terminals align correctly with the markings inside the compartment.
4. Close the battery compartment cover securely.

Image: Graphic illustrating the 12-month battery life and power-saving features of the Rapoo E1050 keyboard.

2.3 Connecting the USB Nano Receiver

The keyboard connects to your computer via a compact USB nano receiver.

1. Locate the USB nano receiver, usually stored in a slot within the battery compartment or packaged separately.
2. Plug the USB nano receiver into an available USB port on your computer.

3. Your computer should automatically detect and install the necessary drivers. This is a plug-and-play device, so no manual driver installation is typically required.

LASER CARVED KEYPAD

Image: Close-up of the compact USB nano receiver plugged into a laptop's USB port, highlighting its plug-and-play functionality.

2.4 First Use

Once the battery is installed and the receiver is plugged in, the keyboard should be ready for use. Begin typing to confirm functionality. The keyboard is compatible with Windows operating systems.

SPILL-RESISTANT DESIGN

DRINKS ALLOWED ON YOUR WORK DESK THANKS TO
THE SPLASH PROOF DESIGN OF E1050.

Image: The Rapoo E1050 keyboard on a desk with dimensions (392mm length, 125.6mm width) and icons indicating compatibility with Windows, Apple, and Android devices.

3. OPERATING INSTRUCTIONS

3.1 Basic Keyboard Functions

The Rapoo E1050 functions as a standard full-size keyboard. All alphanumeric keys, function keys (F1-F12), navigation keys, and the numeric keypad operate as expected.

3.2 Multimedia Function Keys

The keyboard features multimedia function keys accessible via the **Fn** key. Press and hold the **Fn** key, then press the corresponding F-key to activate the desired multimedia function.

Key Combination	Function
Fn + F1	Back

Key Combination	Function
Fn + F2	Forward
Fn + F3	Home Page
Fn + F4	Email
Fn + F5	Media Player
Fn + F6	Previous Track
Fn + F7	Next Track
Fn + F8	Play/Pause
Fn + F9	Stop
Fn + F10	Mute
Fn + F11	Volume Down
Fn + F12	Volume Up

TESTED FOR 10 MILLION + KEYSTROKES

STRONG AND DURABLE

Image: Close-up of the Rapoo E1050 keyboard's function keys (F1-F12) with icons indicating their multimedia functions when used with the Fn key.

3.3 Wireless Range

The Rapoo E1050 offers a reliable wireless connection with an effective range of up to 10 meters (approximately 33 feet). Ensure the keyboard and receiver are within this range for optimal performance.

Image: Illustration showing the Rapoo E1050 keyboard and a monitor, indicating a 10-meter wireless range for connectivity.

4. MAINTENANCE

4.1 Cleaning the Keyboard

The Rapoo E1050 features a spill-resistant design, which helps protect it from accidental liquid spills. However, regular cleaning is recommended to maintain hygiene and performance.

- Disconnect the keyboard from your computer by removing the USB receiver.
- Use a soft, lint-free cloth lightly dampened with water or a mild cleaning solution to wipe the surface of the keyboard.

- For stubborn dirt between keys, use compressed air to blow away debris.
- Ensure the keyboard is completely dry before reconnecting the receiver.

DESIGNED FOR PRODUCTIVITY

UNCLUTTER YOUR WORK DESK WITH RAPOO E1050

Image: Close-up of the Rapoo E1050 keyboard with water splashing over it, demonstrating its spill-resistant design.

4.2 Battery Replacement

When the keyboard's performance degrades or it stops responding, it may be time to replace the AA battery.

1. Turn the keyboard over and open the battery compartment.
2. Remove the old AA battery.
3. Insert a new AA battery, observing the correct polarity (+/-).
4. Close the battery compartment.
5. Dispose of the old battery responsibly according to local regulations.

5. TROUBLESHOOTING

If you encounter issues with your Rapoo E1050 keyboard, please refer to the following common solutions:

5.1 Keyboard Not Responding

- **Check Battery:** Ensure the battery is correctly installed and has sufficient charge. Replace if necessary.
- **Check Receiver Connection:** Make sure the USB nano receiver is securely plugged into a working USB port on your computer. Try a different USB port.
- **Proximity:** Ensure the keyboard is within the 10-meter wireless range of the receiver.
- **Interference:** Move the keyboard away from other wireless devices or large metal objects that might cause interference.
- **Re-establish Connection:** Unplug the USB receiver, wait a few seconds, and then plug it back in.

5.2 Keys Not Functioning Correctly

- **Clean Keys:** Check for any debris or foreign objects lodged under the keys. Refer to the cleaning instructions in Section 4.1.
- **Spill Damage:** If the keyboard has been exposed to a significant liquid spill beyond its spill-resistant capabilities, allow it to dry completely before attempting to use it again. If issues persist, the internal circuitry may be damaged.

5.3 Lag or Delayed Response

- **Reduce Distance:** Bring the keyboard closer to the USB receiver.
- **Minimize Interference:** Ensure there are no strong wireless signals or large electronic devices nearby that could interfere with the 2.4GHz signal.
- **Battery Level:** A low battery can sometimes cause performance issues. Replace the battery.

6. SPECIFICATIONS

Feature	Detail
Brand	Rapoo
Model	E1050
Color	Black
Connectivity Technology	2.4GHz Wireless
Wireless Range	Up to 10 meters
Power Source	Battery Powered (1 x AA battery)
Operating System Compatibility	Windows
Item Dimensions (LxWxH)	39.2 x 12.5 x 2.8 cm
Item Weight	540 g
Included Components	Keyboard

Image: The Rapoo E1050 keyboard with text indicating it is tested for over 10 million keystrokes, emphasizing its strong and durable construction.

7. WARRANTY AND SUPPORT

7.1 Warranty Information

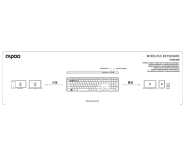

For specific warranty terms and conditions, please refer to the warranty card included with your product packaging or visit the official Rapoo website. Warranty periods may vary by region and product.

7.2 Customer Support

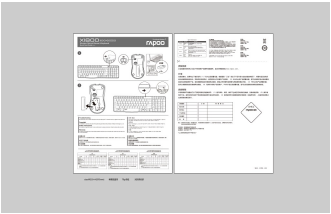

If you require further assistance or have any queries regarding your Rapoo E1050 keyboard, please contact Rapoo customer support:

- **Email:** response.india@rapoo.com
- **Online Resources:** Visit the official Rapoo website for FAQs, driver downloads, and additional support.

Rapoo 2.4G Keyboard Quick Start Guide and Warranty Information

A concise guide to setting up and using the Rapoo 2.4G wireless keyboard, including warranty terms and troubleshooting tips.

lang:en score:16 filesize: 4.44 M page_count: 1 document date: 2022-03-04

RF EXPOSURE EVALUATION	
1. PRODUCT INFORMATION	
Product Description	2.4G Keyboard
Model Name	E1050
Series Model	K800, K260S, K8200P, K1800Plus, K1800Pro
FCC ID	PP22989
2. EVALUATION METHOD	
According to 47CFR2.107 General RF Exposure Guidance v06. The 1-g and 10-g SAR test exclusion thresholds for 100 MHz to 1 GHz at test separation distances ≥ 50 cm are determined by the power of the signal, including antenna efficiency, in W/m ² , test separation distance, and frequency. For 100 MHz to 1 GHz, the 1-g SAR test exclusion threshold is 1.0 W/m ² at 100 MHz to 1 GHz, and the 10-g SAR test exclusion threshold is 0.1 W/m ² at 100 MHz to 1 GHz. When the SAR test exclusion thresholds are exceeded, the SAR test must be performed. Power and distance are measured to the nearest mill and are used for calculation.	
3. CALCULATION	
2.4G P _{max} = 377.08 mW / 0.02 m = 18.854 W The value of the Maximum output power P _{max} is referred to the test report of the CTRF 9.1.2.1. The result for RF exposure evaluation: 5.44 W / 0.02 m / 0.02 m = 13.6 W/m ² < 1.0 W/m ² < 0.1 W/m ² for 100 MHz to 1 GHz.	
4. CONCLUSION	
The SAR evaluation is required.
