Power House 90516-0

PowerHouse 90516-0 Lime Scale Remover Instruction Manual

1. PRODUCT OVERVIEW

The PowerHouse 90516-0 Lime Scale Remover is formulated to effectively eliminate rust, calcium, and lime deposits caused by hard water build-up. This product is suitable for cleaning various surfaces including tile, fiberglass, bathtubs, vaporizers, porcelain, sinks, shower curtains, glass, toilets, and shower doors.

Image 1: A green plastic bottle of PowerHouse Lime Scale Remover. The label clearly indicates it helps eliminate rust, calcium, and lime caused by hard water build-up.

2. SAFETY INFORMATION

This product contains chemicals that can be harmful if misused. Always read the entire label before use. Keep out of reach of children and pets. Avoid contact with eyes and skin. In case of contact, rinse thoroughly with water. If swallowed, do not induce vomiting; seek immediate medical attention. Use in a

well-ventilated area. Wear appropriate protective gloves and eye protection during application.

Do not mix with bleach or other household cleaners, as this may release hazardous gases.

3. USAGE INSTRUCTIONS

3.1. Setup and Preparation

- Ensure the area is well-ventilated. Open windows or use an exhaust fan.
- Wear rubber gloves and eye protection (safety glasses or goggles) to prevent skin and eye contact.
- Test the product on an inconspicuous area first to ensure compatibility with the surface, especially on colored grout, delicate finishes, or unknown materials.

3.2. Operating and Application

1. **General Application:** Apply the PowerHouse 90516-0 Lime Scale Remover directly to the affected surface. For general hard water stains, rust, calcium, and lime deposits, allow the product to sit for a few minutes (e.g., 3-5 minutes) to penetrate the build-up. Do not allow the product to dry on the surface.
2. **For Stubborn Stains:** A brush or sponge may be used to gently agitate the area. Repeat application if necessary for heavy deposits.
3. **Rinsing:** After application, rinse the treated surface thoroughly with clean water. Wipe dry with a clean cloth to prevent water spots.
4. **Specific Surfaces:**
 - **Toilets:** Pour directly into the bowl, scrub with a toilet brush, and flush.
 - **Shower Doors/Glass:** Apply with a sponge, wipe the surface, and rinse thoroughly.
 - **Tile/Fiberglass/Porcelain/Sinks/Bathtubs:** Apply the product, scrub gently with a non-abrasive sponge or brush, and rinse completely.

4. MAINTENANCE AND STORAGE

Store the product in its original container, tightly closed, in a cool, dry place, away from direct sunlight and incompatible materials. Do not store near food or beverages. Ensure the cap is securely fastened after each use to prevent spills and maintain product integrity. Keep away from heat sources.

5. TROUBLESHOOTING

- **Stains Persist:** If stains remain after initial application, reapply the product and allow for a slightly longer dwell time (e.g., 5-10 minutes), then scrub and rinse. For extremely heavy build-up, multiple applications may be required.
- **Skin/Eye Irritation:** If irritation occurs after contact, discontinue use immediately. Rinse affected area with plenty of water. If irritation persists, consult a medical professional.
- **Product Not Working:** Ensure the surface is clean of other cleaners or residues before application. Verify that the product is being used for its intended purpose (lime, rust, calcium removal).

6. PRODUCT SPECIFICATIONS

Feature	Detail
Brand	Power House
Model Number	90516-0
