## 1. IMPORTANT SAFETY INFORMATION

**ALLERGY ALERT TEST MUST BE DONE 24 HOURS BEFORE USE.** Hair colorants can cause severe allergic reactions. Read and follow instructions carefully. This product is not intended for use on persons under the age of 16. Temporary 'black henna' tattoos may increase your risk of allergy.

Do not color your hair if:

- You have a rash on your face or sensitive, irritated and damaged scalp.
- You have ever experienced any reaction after coloring your hair.
- You have experienced a reaction to a temporary 'black henna' tattoo in the past.

Wear suitable gloves. Avoid contact with eyes. Rinse eyes immediately if product comes into contact with them. Do not use to dye eyelashes or eyebrows. Rinse hair well after application. Keep out of reach of children.

## 2. PRODUCT OVERVIEW

Garnier Color Naturals Men Permanent Hair Colour Cream in Natural Black 1 provides natural-looking color with 100% grey coverage. Enriched with 3 precious oils, this no-ammonia formula is designed for men and offers long-lasting color for up to 8 weeks.

### 3. WHAT'S IN THE BOX

Each Garnier Color Naturals Men Permanent Hair Colour Cream kit contains the following components:

- **30g Colorant:** Cream hair color (Step 1).
- **30g Developer:** Developer milk (Step 2).
- **Gloves:** For protection during application.
- **Instruction Leaflet:** Detailed usage guide.

Image: Visual representation of the kit contents, including the 30g Colorant tube, 30g Developer bottle, and a pair of gloves.

### 4. SETUP AND PREPARATION

1. **Perform Allergy Alert Test:** 24 hours before application, apply a small amount of the product mixture to a discreet area of skin, such as behind the ear or on the inner elbow. Observe for any adverse reactions. Do not proceed if irritation occurs.
2. **Gather Materials:** Ensure you have the hair color kit, a non-metallic bowl (glass or plastic), a brush for application, a timer, and an old towel to protect your clothes.

3. **Protect Your Skin:** Apply a thin layer of petroleum jelly or a rich cream around your hairline, ears, and neck to prevent skin staining.
4. **Wear Gloves:** Put on the protective gloves provided in the kit before handling any of the hair color components.

## 5. APPLICATION INSTRUCTIONS

Follow these steps carefully for optimal results:

1. **Put on Gloves:** Ensure you are wearing the protective gloves provided.
2. **Mix Colorant and Developer:** Squeeze the entire contents of the Colorant tube (Step 1) and the Developer milk bottle (Step 2) into a non-metallic bowl. Mix thoroughly with a brush until a uniform cream is achieved.
3. **Apply Mixture:** Using the brush, apply the mixture evenly to your dry, unwashed hair. Start from the roots and work your way to the tips, ensuring all hair is covered.
4. **Wait:** Leave the mixture on your hair for 30 minutes. Use a timer to ensure accurate processing time.
5. **Rinse Hair:** After 30 minutes, rinse your hair thoroughly with water until the water runs clear.
6. **Reveal Color:** Your natural-looking color is now revealed.

Image: Diagram illustrating the 'How to Use' steps: 1. Put on gloves, 2. Mix colorant & developer, 3. Apply mixture, 4. Leave on for 30 mins, 5. Rinse hair, 6. Reveal natural looking color.

## 6. MAINTENANCE AND AFTERCARE

To maintain your hair color and ensure its longevity:

- **Rinse Thoroughly:** After the processing time, rinse your hair until the water runs completely clear to remove all traces of the product.
- **Use Color-Safe Products:** Wash your hair with shampoos and conditioners specifically designed for color-treated hair. These products help to lock in color and prevent fading.
- **Limit Washing:** Washing your hair less frequently can help extend the life of your color. Consider using dry shampoo between washes.
- **Protect from Sun:** Prolonged exposure to direct sunlight can cause hair color to fade. Consider

wearing a hat or using UV-protective hair products.

- **Color Longevity:** The permanent hair color is designed to last for up to 8 weeks, providing a 'Color-Lock' effect. Reapply as needed when roots begin to show or color fades.

## 7. TROUBLESHOOTING

---

If you encounter any issues during or after coloring, consider the following:

- **Uneven Color:** Ensure the product is applied evenly and thoroughly to all desired hair sections. Insufficient product or uneven application can lead to patchy results.
- **Color Not as Expected:** Hair color results can vary based on your natural hair color, previous treatments, and hair porosity. Always perform a strand test on a small, hidden section of hair before full application to preview the result.
- **Skin Staining:** If skin staining occurs, gently wipe the affected area with a damp cloth immediately after application. For stubborn stains, a small amount of rubbing alcohol or a specialized color remover can be used, but test on a small area first.
- **Allergic Reaction:** If you experience itching, burning, redness, or swelling during or after application, rinse immediately and seek medical attention. This emphasizes the importance of the 24-hour allergy alert test.

## 8. PRODUCT SPECIFICATIONS

---

<b>Brand</b>	Garnier
<b>Product Name</b>	Color Naturals Men Permanent Hair Colour Cream
<b>Color</b>	1 Natural Black
<b>Item Form</b>	Cream
