SETUP AND INSTALLATION

Proper installation ensures the longevity and appearance of your new emblem. Follow these steps carefully:

- Preparation:** Ensure the installation surface on your vehicle is clean, dry, and free of any wax, grease, or debris. Use an automotive-grade cleaner to thoroughly clean the area.
- Temperature:** Install the emblem in a moderate temperature environment (ideally above 60°F / 15°C) to ensure optimal adhesive bonding.
- Positioning:** Carefully align the new emblem with the existing mounting points or the outline of the previous emblem. It is recommended to temporarily mark the position with painter's tape before removing the adhesive backing.

4. **Adhesive Application:** Peel off the protective backing from the adhesive on the rear of the emblem. Avoid touching the adhesive surface with your fingers.
5. **Attachment:** Press the emblem firmly onto the prepared surface. Apply even pressure across the entire emblem for at least 30 seconds to ensure a strong bond.
6. **Curing Time:** Allow the adhesive to cure for at least 24 hours before washing the vehicle or exposing it to extreme weather conditions.

OPERATING INSTRUCTIONS

The Mazda F189-51-731 Ornament is a static decorative and identification component. It does not require any operational input from the user after installation. Its function is purely visual, serving as a brand emblem for your vehicle.

MAINTENANCE AND CARE

To maintain the appearance and integrity of your Mazda emblem, follow these simple care guidelines:

- **Cleaning:** Clean the emblem regularly with mild automotive soap and water. Use a soft cloth or sponge to avoid scratching the chrome finish.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, strong solvents, or harsh chemicals, as these can damage the chrome plating or the underlying paint.
- **Waxing:** When waxing your vehicle, you may apply a thin coat of automotive wax over the emblem to protect its finish, but ensure no wax residue is left in crevices.
- **Pressure Washing:** When using a pressure washer, maintain a safe distance and avoid directing a high-pressure stream directly at the edges of the emblem to prevent adhesive degradation.

TROUBLESHOOTING

Most issues related to an emblem are visual or installation-related. Here are common concerns and their solutions:

- **Emblem Not Sticking:**
 - Ensure the surface was thoroughly cleaned and dry before application.
 - Verify installation occurred in appropriate temperature conditions.
 - Apply firm, even pressure across the entire emblem during installation.
- **Chrome Finish Dull or Scratched:**
 - Clean with mild soap and water using a soft cloth.
 - Avoid abrasive cleaning materials or harsh chemicals.
 - Minor scratches may be polished with a chrome-specific polish, but deep scratches may require replacement.
- **Emblem Misaligned:**
 - If the adhesive has not fully cured, it may be possible to carefully reposition. However, once fully bonded, removal and reapplication may damage the emblem or vehicle paint.
 - Prevention is key: always pre-align and mark the position before removing the adhesive backing.
