SAMSON Auro D208

Samson Auro D208 8-Inch Active Loudspeaker

INSTRUCTION MANUAL

Introduction

This manual provides essential information for the proper setup, operation, and maintenance of your Samson Auro D208 8-Inch Active Loudspeaker. Please read these instructions thoroughly before using the product to ensure optimal performance and safety.

Safety Information

Always follow basic safety precautions when using this product to reduce the risk of fire, electric shock, or injury. Keep the loudspeaker away from water and moisture. Do not block ventilation openings. Refer all servicing to qualified personnel.

Package Contents

Verify that your package contains the following items:

- Samson Auro D208 8-Inch Active Loudspeaker
- Power Cable
- User Manual

Setup

Placement

The Auro D208 is designed for versatile placement. It can be used as a main PA speaker, a floor monitor, or mounted on a standard 1 3/8-inch (35mm) pole. Ensure the speaker is placed on a stable, level surface or securely mounted to prevent tipping.

Connections

The Auro D208 features a Mic/Line input and an additional Line output for linking multiple speakers.

1. **Power Connection:** Connect the supplied power cable to the AC inlet on the rear panel and then to a suitable power outlet.
2. **Input Connection:** Use an XLR or 1/4-inch cable to connect your microphone or line-level audio source (e.g., mixer, instrument) to the Mic/Line input.
3. **Linking Speakers:** To connect additional Auro D208 speakers, use an XLR cable from the Line output of the first speaker to the input of the next speaker.

Operating Instructions

Powering On/Off

After all connections are made, turn on the power switch located on the rear panel. It is recommended to turn on the Auro D208 last in your audio chain and turn it off first.

Volume Control

Adjust the main Volume control knob on the rear panel to set the overall output level of the loudspeaker. Start with the volume at its minimum setting and gradually increase it to the desired level.

Clip LED Indicator

The Clip LED illuminates when the input signal is too strong, indicating potential distortion. If the Clip LED lights up frequently, reduce the input level from your source or the volume on the Auro D208 to prevent signal clipping.

Maintenance

Cleaning

Clean the exterior of the loudspeaker with a soft, dry cloth. Do not use abrasive cleaners, solvents, or waxes. Ensure the speaker is unplugged before cleaning.

Storage

When not in use, store the loudspeaker in a dry, cool environment, away from direct sunlight and extreme temperatures. If storing for extended periods, consider covering it to protect against dust.

Troubleshooting

Problem	Possible Cause	Solution
No Sound	No power; input cable disconnected; volume too low.	Check power connection and switch; ensure input cables are secure; increase volume.
Distorted Sound	Input signal too high (clipping); faulty cable.	Reduce input level from source or speaker volume; replace cable.
Hum or Buzz	Ground loop; faulty cable; interference.	Ensure all equipment is on the same electrical circuit; try different cables; move away from power sources.

Specifications

Feature	Detail
Brand	SAMSON
Model Name	Auro D208
Model Number	SAROD208A
Speaker Type	2-Way Active Loudspeaker
Speaker Size	8 Inches
Woofer Diameter	8 Inches
Tweeter Diameter	1 Inches

Feature	Detail
