Orbegozo SV 2020

Orbegozo SV 2020 Steam Iron User Manual

Model: SV 2020

Product Overview

The Orbegozo SV 2020 Steam Iron is designed for efficient and effective garment care. It features a durable stainless steel soleplate, a self-cleaning function for easy maintenance, and a precise temperature regulator to suit various fabric types. Equipped with a spray device and steam ejection capabilities, it ensures smooth ironing results. For safety, it includes overheat protection and operates on 230V at 50Hz.

Safety Instructions

- Always ensure the iron is unplugged before filling or emptying the water tank, and before cleaning.
- Do not immerse the iron, cord, or plug in water or other liquids.
- Keep the iron out of reach of children when it is hot or cooling down.
- Use the iron only for its intended purpose as described in this manual.
- Do not operate the iron with a damaged cord or plug, or if it has been dropped or damaged.
- Place the iron on a stable, heat-resistant surface when not in use.
- The soleplate can become extremely hot; avoid direct contact.
- This appliance is for household use only.

Setup

1. **Unpacking:** Carefully remove the iron from its packaging. Retain the packaging for future storage or transport.
2. **First Use:** Before first use, wipe the soleplate with a damp cloth to remove any manufacturing residue. It is normal for a slight odor or smoke to be emitted during the first few minutes of operation; this will dissipate.

3. **Filling the Water Tank:**
    - Ensure the iron is unplugged.
    - Open the water inlet cover.
    - Fill the water tank with clean tap water up to the MAX fill line. Do not overfill.
    - Close the water inlet cover securely.

Operating Instructions

Dry Ironing

1. Ensure the water tank is empty or the steam control is set to the 'no steam' position.
2. Plug the iron into a suitable 230V, 50Hz power outlet.
3. Set the temperature regulator to the desired setting based on the fabric type. Refer to the fabric care labels on your garments.
4. Wait for the indicator light to turn off, signifying that the iron has reached the selected temperature.
5. Begin ironing.

Steam Ironing

1. Fill the water tank as described in the Setup section.
2. Plug the iron into a suitable power outlet.
3. Set the temperature regulator to the 'steam' range (usually indicated by a steam symbol or higher temperature settings).
4. Wait for the indicator light to turn off.
5. Adjust the steam control knob to the desired steam output.
6. Begin ironing. For stubborn creases, use the **steam shot** button for an extra burst of steam.

Spray Function

The spray function helps to dampen stubborn creases. Press the spray button to release a fine mist of water onto the fabric. Ensure the water tank has sufficient water.

Vertical Steam

The vertical steam function allows you to remove creases from hanging garments, curtains, or drapes. Hold the iron vertically, close to the fabric, and press the steam shot button repeatedly. Ensure the iron is at its maximum temperature setting for optimal results.

Maintenance

Cleaning the Soleplate

- Ensure the iron is unplugged and completely cool.
- Wipe the soleplate with a damp cloth and a non-abrasive cleaner if necessary.
- Do not use abrasive scouring pads or harsh chemicals as they can damage the soleplate.

Self-Cleaning Function (Autolimpieza)

This function helps to remove scale and impurities from the steam chamber. It is recommended to use this function regularly, especially if you live in a hard water area.

1. Fill the water tank to the MAX level.
2. Plug in the iron and set the temperature to maximum.

3. Once the indicator light turns off, unplug the iron.
4. Hold the iron horizontally over a sink.
5. Press and hold the self-clean button (often labeled "Autolimpieza" or similar). Hot water and steam will be expelled from the soleplate, carrying impurities with them.
6. Gently shake the iron back and forth until the water tank is empty.
7. Plug the iron back in and let it heat up to dry the soleplate.
8. Unplug and store once cool.

Storage

After use, unplug the iron and allow it to cool completely. Empty any remaining water from the tank. Store the iron upright in a safe, dry place.

Troubleshooting

Problem	Possible Cause	Solution
Iron does not heat up.	Not plugged in; power outlet fault; temperature dial set to MIN.	Check plug and outlet; set temperature dial to desired heat.
No steam.	Water tank empty; temperature too low; steam control set to 'no steam'; scale build-up.	Fill water tank; set temperature to steam range; adjust steam control; perform self-cleaning.
Water leaks from soleplate.	Temperature too low for steam; overfilled water tank; iron not hot enough for steam.	Ensure iron is at steam temperature; do not overfill; wait for indicator light to turn off before steaming.
White flakes coming from soleplate.	Mineral deposits (scale) in the water tank/steam chamber.	Perform the self-cleaning function. Use distilled water in hard water areas.

Specifications

Model: SV 2020

Brand: Orbegozo

Power: 2000 Watts

Voltage: 230 Volts

Frequency: 50 Hz

Soleplate Material: Stainless Steel

Color: Blue/White

Dimensions (L x W x H): 11.3 x 26.5 x 14.5 cm (approx. 4.45 x 10.43 x 5.71 inches)

Weight: 929 grams (approx. 2.05 lbs)

Features: Self-cleaning function, Spray function, Steam ejection, Dry ironing, Overheat protection, Temperature regulator, 360° rotating cable.
