

## Edifier MP250

# Edifier MP250 Sound to Go Portable Speaker/Sound Bar User Manual

Model: MP250

## 1. INTRODUCTION

Thank you for purchasing the Edifier MP250 Sound to Go Portable Speaker/Sound Bar. This manual provides detailed instructions for the proper setup, operation, and maintenance of your device. Please read this manual thoroughly before use to ensure optimal performance and longevity of your speaker.

## 2. PRODUCT OVERVIEW

The Edifier MP250 is a compact and portable speaker designed to enhance audio from various devices. It features a sleek design and offers versatile connectivity options.

### 2.1 Key Features

- USB Port for power and audio connection.
- Portable design for easy transport.
- Bluetooth wireless communication technology.
- Battery-powered for use on the go.
- Suitable for smartphones, tablets, and televisions.

### 2.2 Package Contents

Please check the package contents upon unboxing. If any items are missing or damaged, contact your retailer.

- Edifier MP250 Speaker/Sound Bar
- USB Cable
- Audio Cable (AUX)
- User Manual (this document)
- Carrying Pouch (velvet)

### 2.3 Product Diagram

Familiarize yourself with the various parts of your Edifier MP250 speaker.

**Figure 1:** Front view of the Edifier MP250 Sound to Go Portable Speaker. This image displays the speaker's main grille and sleek, elongated design.

**Figure 2:** Top view of the Edifier MP250 Sound to Go Portable Speaker. This image shows the slim profile and the Edifier branding along the top surface.

## 3. SETUP

---

Follow these steps to set up your Edifier MP250 speaker.

### 3.1 Powering the Speaker

1. **USB Power:** Connect the supplied USB cable to the speaker's USB port and then to a powered USB port on your computer or a USB wall adapter (not included). The speaker will draw power and can also receive audio via this connection.
2. **Internal Battery:** The speaker is equipped with an internal battery for portable use. Ensure the battery is charged by connecting it to a USB power source.

### 3.2 Audio Connection

The Edifier MP250 offers multiple ways to connect to your audio source.

1. **USB Audio:** When connected to a computer via USB, the speaker can function as an external sound card, receiving audio directly through the USB cable. Select the Edifier MP250 as your audio output device in your computer's sound settings.

2. **Bluetooth Connection:**
- Turn on the speaker.
  - Activate Bluetooth on your audio source (smartphone, tablet, etc.).
  - Search for "Edifier MP250" in the list of available Bluetooth devices.
  - Select and pair with the speaker. A confirmation sound may indicate successful pairing.
3. **AUX Input:** Connect one end of the supplied 3.5mm audio cable to the AUX input port on the speaker and the other end to the headphone jack or audio output of your device.

## 4. OPERATING INSTRUCTIONS

### 4.1 Basic Operation

- **Power On/Off:** Locate the power button, typically on one of the ends or the back of the speaker. Press and hold to turn on or off.
- **Volume Control:** Use the volume buttons (usually '+' and '-') on the speaker to adjust the playback volume. You can also control the volume from your connected audio source.
- **Mode Selection:** If the speaker supports multiple input modes (USB, Bluetooth, AUX), there may be a mode button to switch between them. Refer to the product diagram for exact button locations.

### 4.2 Audio Playback

Once connected, begin playing audio from your source device. The sound will be routed through the Edifier MP250 speaker.

- Ensure the volume on both the speaker and your audio source is set to an audible level.
- For optimal sound quality, avoid setting the volume to maximum on both devices simultaneously, as this may cause distortion.

## 5. MAINTENANCE

Proper care will extend the life of your Edifier MP250 speaker.

- **Cleaning:** Use a soft, dry cloth to clean the speaker's surface. Do not use liquid cleaners or abrasive materials.
- **Storage:** When not in use for extended periods, store the speaker in a cool, dry place, preferably in its velvet carrying pouch.
- **Battery Care:** If the speaker has an internal battery, avoid fully discharging it frequently. Charge it periodically even when not in use to maintain battery health.
- **Water Resistance:** The product specifications indicate it is waterproof. However, avoid submerging the device or exposing it to excessive moisture to prevent damage to internal components.

## 6. TROUBLESHOOTING

If you encounter issues with your Edifier MP250, refer to the following common problems and solutions.

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
No sound	Speaker not powered on; Volume too low; Incorrect input mode; Loose cable connection; Bluetooth not paired.	Ensure speaker is powered on and charged. Increase volume on both speaker and source. Select correct input mode (USB, Bluetooth, AUX). Check all cable connections. Re-pair Bluetooth device.
Distorted sound	Volume too high; Audio source issue; Speaker placement.	Reduce volume on speaker and/or source. Test with a different audio source. Adjust speaker placement.
Bluetooth not connecting	Speaker not in pairing mode; Device too far; Interference.	Ensure speaker is in Bluetooth pairing mode. Move device closer to speaker. Avoid obstacles and other wireless devices. Forget and re-pair the device.
Speaker not charging	Faulty USB cable; USB port not providing power; Damaged charging port.	Try a different USB cable. Connect to a different powered USB port. If issue persists, contact support.

## 7. SPECIFICATIONS

Note:

- Power input: 100-240V 50/60Hz 180W.
- The plug type is meant for European countries only.
- All audio inputs including Bluetooth connection can be used in parallel.
- The speaker will be muted when you connect your headphones to the 3.5mm port.
- You can control the headphone volume with the volume knob on the speaker.

#### 4. Mode switch

Press and hold the "Q" knob to switch the speaker between work mode and standby mode.

#### 5. Control

Buttons/Icon	Mode	Action
	Standby mode	Press to switch sound effects.
	Work mode	Rotate clockwise to increase volume.
	Work mode	Rotate counter-clockwise to decrease volume.
	Work mode	Press and hold to disconnect the current Bluetooth device and switch the speaker to Bluetooth pairing mode.
	Bluetooth hidden mode	Press to exit Bluetooth hidden mode and enter Bluetooth pairing mode.

Note: Volume keys is not supported. To adjust the volume, adjust on the speaker and your device separately.

#### 6. Indicator status

Indicator status	Speaker status
Indicator	Monitor effect effect
Solid green	Main sound effect
Solid white	Customized sound effect
Flashing	Bluetooth pairing mode
Flashing and then red and	Bluetooth error connection
Flashing red and green	Upgrading the firmware

#### 7. Bluetooth connection

- Press the "F" button on the speaker. The indicator will flash.
- On your device, select "EDIFIER MR3" in the Bluetooth device list to connect. The indicator will be steady if the connection is established.
- The speaker will automatically reconnect to the last connected Bluetooth device after it is switched to work mode. For example, the "F" button on the speaker is not needed to reconnect.
- To disconnect from the current Bluetooth device, press and hold the "F" button on the speaker for 10 seconds.

Note:

- "F" mode for connection is "HID" if needed.
- In step of Bluetooth function of this product, make sure that your audio device driver supports A2DP and AVRCP profiles.
- If no device is connected in 7 minutes, the speaker will switch to Bluetooth hidden mode. In this mode, it will not receive current Bluetooth signal (Q) for a device that exists in the pairing record of this speaker, you can select "EDIFIER MR3" from the Bluetooth device list to reconnect. To exit from Bluetooth hidden mode, press the "F" button on the speaker.

#### 8. Multipoint connection

This speaker supports the simultaneous connection of two Bluetooth devices.

- Connect the first Bluetooth device to the speaker.
- Press and hold the "F" button on the speaker for 10 seconds.
- On the second Bluetooth device, select "EDIFIER MR3" in the Bluetooth device list to connect.
- On the first Bluetooth device, select "EDIFIER MR3" in the Bluetooth device list to reconnect.

Please stop playback on the current Bluetooth device before connecting audio from the second one.

#### 9. Acoustic tuning

By the speaker knob:

"High" knob: Turn the knob to boost or cut high frequency above 10kHz by 10dB.

"Low" knob: Turn the knob to boost or cut low frequency around 100Hz by 10dB.

By the EDIFIER Connect App:

Low cutoff: Adjusts frequency lower than the specified frequency (20~100Hz) at a selected slope (6, 12, 18, or 24dB/octave).

Acoustic space: Selects a preset sound compensation for the listening space, which varies with speaker placement (e.g., for listening in the middle of the room and -10dB for listening in the corner). The closer the speaker is to a wall or corner, the smaller the result is in dB.

Dynamic control: When the speaker is placed on a desktop or on a shelf or is placed in front of a glass table, an apparent increase in the audible level at certain frequencies. Enable the feature to mitigate this effect.

## Edifier MR3 Studio Monitor Speaker User Manual

This manual provides instructions for setting up, connecting, and using the Edifier MR3 Studio Monitor Speakers, including details on the EDIFIER ConneX app, Bluetooth connectivity, multipoint connection, acoustic tuning, and troubleshooting.

Total output power (PAPR): 19W+19W (EIRP cell)  
Frequency response: 512K-608K  
Declaration for EU  
Frequency Band: 2.482GHz ~ 2.486GHz  
RF Power Output: <11 dBm (EIRP)  
There is no restriction of use.

Cannot connect to your Bluetooth device

- Make sure that the distance between this product and your Bluetooth device

- Make sure that the distance between this product and your Bluetooth device is less than 10 meters and there are no obstacles between them.
- Make sure that no device is connected to this product via Bluetooth.
- Make sure that this product is in Bluetooth pairing mode. If not, manually switch it to this mode.
- Restart this product, enable Bluetooth function on your Bluetooth device, and then try again.
- Reset this product to factory settings and try again.

**No power**

- Make sure that the power cable is properly connected.
- Make sure that the power supply is not disconnected.

**No sound**

- Make sure that this product and your device is properly connected.
- Make sure that the correct audio input source is selected.
- Make sure that the **playback** is not paused.
- Increase the volume of this product and your device.

**Noise coming from speakers**  
EDIFIER speakers generate little noise, while the background noise of some audio devices are too high. Please unplug audio cables and turn the volume up. If no sound can be heard at 1 meter away from the speaker, there is no problem with this product.

2. Press the **BT** button on the second QD25. The white LED will be in breathing pattern.  
3. Once the connection is established, the blue LED on the first QD25 will be steady. If it is blue fast, and the white LED on the second QD25 will light up.  
4. Connect the two QD25 to your Bluetooth device and start playing.  
5. To add the second device, press the **BT** button.  
**Note**  
1. The first QD25 will work as the master speaker. You can control play on the first QD25.  
2. The first QD25 will deliver right channel audio and the second one is for the left channel audio.  
3. When two speakers are powered on again, they will connect automatically.

#### 7. Play control

In USB audio streaming mode, volume type is not supported. To adjust the volume, adjust on the speaker and your device separately.

#### 8. USB connection

**Note**  
The following operating systems support USB audio streaming: Windows 11, Windows 10, Windows 8, and Windows 7.

#### 9. Light effects

**Note**  
You can customize light effects and turn on/off the lighting on EDIFIER Connect App.

#### 10. Specifications

Total output power (RMS): 10 W (30W peak) • 10 W (30W)  
Frequency response: 62 Hz-40 kHz  
Distortion: less than 1%  
Frequency Band: 2.402 GHz • 2.480 GHz  
RF Power Output: 10 dBm (200mW)  
There is no restriction of use.

#### 11. Troubleshooting

**Cannot connect to your Bluetooth device**  
- Make sure that the distance between this product and your Bluetooth device is less than 10 meters and there are no obstacles between them.  
- Make sure that the device is connected to the product via Bluetooth.  
- Make sure that this product is in Bluetooth pairing mode if not, manually switch to BT mode.  
- Restart this product, enable Bluetooth function on your Bluetooth device, and then try again.  
- Restart the product to factory settings and try again.

**No sound**  
- Make sure that the product and your device is properly connected.  
- Make sure that the correct audio input source is selected.  
- Make sure that the playback is not paused.  
- Increase the volume of this product and your device.

**Noise coming from speakers**  
- QD25 speakers generate little noise, while the background noise of some audio devices is too high. Please plug audio cables and turn the volume up. If the sound can be heard at a lower level from the speaker, there is no problem with this product.
