## Aqua Power/Kent Investment/7in1 FERGRELMAABBCC

# Aqua Power C4 Quick Dry Commercial Carpet Extractor User Manual

Model: FERGRELMAABBCC  
Brand: Aqua Power/Kent Investment/7in1

## INTRODUCTION

The Aqua Power C4 Quick Dry Commercial Carpet Extractor is a robust, commercial-grade hot water extractor designed for effective carpet and upholstery cleaning. Engineered for durability and performance, this machine is built to provide years of reliable service. It features an adjustable handle, a large four-gallon tank, and commercial-grade components, making it suitable for both residential and professional use. The C4 has earned the top rating from the Carpet and Rug Institute, ensuring superior cleaning results.

## SETUP

Before operating your Aqua Power C4, ensure proper setup for optimal performance and safety.

### 1. Handle Adjustment

The machine features an adjustable and collapsible handle for comfortable operation and compact storage. To adjust the handle, locate the adjustment mechanism near the base of the handle and follow the instructions provided on the machine's label. Ensure the handle is securely locked in place before use.

### 2. Filling the Solution Tank

The Aqua Power C4 is equipped with a large four-gallon solution tank. To fill, remove the recovery bucket and pour hot water and your chosen cleaning solution into the designated tank. The design allows for convenient filling and emptying, minimizing downtime during cleaning tasks. Note that the unit contains a heating element but does not generate steam.

### 3. Connecting Accessories

If using a hand tool or wand attachment (sold separately), connect it to the appropriate ports on the machine. Ensure all connections are secure to prevent leaks and maintain suction.

### 4. Power Connection

Connect the machine's power cord to a suitable electrical outlet. The unit is hand-operated in the sense that it is not battery-powered and requires a direct electrical connection for operation.

# DESIGNED AND BUILT FOR **EASY OPERATION**

Image: A detailed diagram illustrating the easy-to-reach switches, adjustable handle, sight tubes, and removable recovery bucket for efficient operation.

## **OPERATING INSTRUCTIONS**

The Aqua Power C4 is designed for efficient and effective deep cleaning of carpets and upholstery.

### **1. Pre-Cleaning Preparation**

Before operating the extractor, vacuum the area thoroughly to remove loose dirt and debris. For heavily soiled areas or stubborn spots, pre-treat with an appropriate cleaning solution. The machine's hand tool (if acquired) is particularly effective for spot treatment before general cleaning.

### **2. General Operation**

Engage the appropriate switches for spraying solution and activating the vacuum. Slowly push the machine forward over the carpet, allowing the solution to penetrate the fibers. Pull the machine back over the same area to extract the dirty water. Overlap each pass slightly to ensure comprehensive cleaning.

### **3. Efficient Water Usage**

The C4 Quick Dry Extractor is designed for superior value, using approximately half the water compared to many leading brands. This efficiency allows you to clean larger areas without frequent refilling and emptying of the tanks, contributing to quicker drying times.

### **4. Upholstery and Spot Cleaning**

For upholstery or hard-to-reach areas, utilize the hand tool. Apply solution and extract carefully, ensuring not to over-wet the fabric. The long hose of the hand tool provides excellent reach for detailed cleaning.

# GREAT FOR FAMILIES

**Cleans Deep,  
Dries Quick!**

- PET & Kid Messes
- Power When You need it
- Reliable, Built to Last

Image: The Aqua Power C4 is highly effective for cleaning up pet and kid messes, providing a clean environment for families.

## MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your Aqua Power C4.

### 1. Post-Operation Cleaning

After each use, empty the dirty water from the recovery bucket. Rinse both the solution tank and the recovery bucket thoroughly with clean water. It is crucial to clean the machine to prevent residue buildup and maintain hygiene.

### 2. Inspecting Components

Periodically inspect all hoses, connections, and the main unit for any signs of wear, damage, or blockages. Ensure the sight tubes are clear for accurate monitoring of water levels. The robust construction of the C4 means it is built to last, but regular checks are still recommended.

### 3. Storage

Store the machine in a clean, dry place. The collapsible handle allows for more compact storage. Ensure all tanks are empty and dry before storing to prevent mold or mildew growth.

## TROUBLESHOOTING

This section provides solutions to common issues you might encounter with your Aqua Power C4.

### 1. No Suction or Poor Suction

- Check if the recovery bucket is properly sealed and latched.
- Inspect hoses for kinks, blockages, or disconnections.
- Ensure the recovery bucket is not overfilled.

### 2. No Solution Spray

- Verify that the solution tank has enough water and cleaning solution.
- Check for blockages in the spray nozzle.
- Ensure the spray switch is activated.

### 3. Machine Not Turning On

- Confirm the power cord is securely plugged into a working electrical outlet.
- Check the circuit breaker if the outlet has no power.
- Ensure all switches are in the correct operating position.

For issues not covered here or persistent problems, please contact factory support for assistance. The manufacturer provides full support and parts availability.
